Life is a JOURNEY. Enjoy the ride!

MINI COOPER SHOWN WITH CP-5M UNIVERSAL LIP MOUNT AND COAX CABLE COMBINATION. NO HOLES TO DRILL!

MODEL	ANT CONN / COAX CONN
CP-5M	SO-239 / PL-259
CP-5NMO	NMO / PL-259
CP-5 3/8-24	3/8-24 / PL-259

Heavy-duty adjustable lip mount bracket with 16' 6" deluxe cable assy includes 18" mini RG-188A/U type coax for weather seal entry.

Max antenna 70" Attaches to trunk side/ van door/SUV door/ truck doors etc..

COMET BNC-24 **DUAL-BAND 2M/70CM HT ANTENNA** RX range: 100-1200MHz
• Gain: 2.15/3.5dBi • Length: 17" • Conn: BNC Super flexible featherweight whip

COMET SMA-24 **DUAL-BAND 2M/70CM HT ANTENNA** RX range: 100-1200MHz
• Gain: 2.15/3.5dBi • Length: 17" • Conn: SMA Super flexible featherweight whip

COMET SMA-503 **DUAL-BAND 2M/70CM HT ANTENNA** RX range: 100-1200MHz
• Length: 8.75" • Conn: SMA

Maldol MH-209 *(BNC Conn)* MH-209SMA *(SMA Conn)* **2M/70CM DUAL-BAND HT ANTENNAS**
3" length, soft rubber cover. Good performance in a small package!

COMET NEW! CSB750A **DUAL-BAND 2M/440MHZ W/FOLD-OVER**
Gain & Wave: 146MHz 3.6dBi 1/2 wave, 446MHz 6.1dBi, 5/8 wave x 2 • VSWR: 1.5:1 or less • Length: 42" • Conn: PL-259 • Max Pwr: 150W

COMET NEW! CSB770A **DUAL-BAND 2M/440MHZ W/FOLD-OVER**
Gain & Wave: 146MHz 4.4dBi 5/8 wave center load, 446MHz 6.9dBi 5/8 wave x 2 center load • VSWR: 1.5:1 or less • Length: 51"
• Conn: PL-259 • Max Pwr: 150W

COMET NEW! CSB790A **DUAL-BAND 2M/440MHZ W/FOLD-OVER**
Gain & Wave: 146MHz 5.1dBi 7/8 wave center load, 446MHz 7.7dBi 5/8 wave x 3 center load • VSWR: 1.5:1 or less • Length: 62"
• Conn: PL-259 • Max Pwr: 150W

Maldol AX-50 **DUAL-BAND 2M/440MHz**
Gain & Wave: 2M 1/4 wave • 70cm 5.0dBi 9/8 wave • Length: 21" • Conn: PL-259 • Max Power: 60W

Maldol AX-75 **DUAL-BAND 2M/440MHz W/FOLD-OVER**
Gain & Wave: 2M 1/2 wave center load 3.2dBi • 70cm 5/8 wave x 2 5.7dBi • Length: 30" • Conn: PL-259 • Max Power: 60W

Maldol AX-95 **DUAL-BAND 2M/440MHz W/FOLD-OVER**
Gain & Wave: 2M 1/2 wave center load 3.3dBi • 70cm 5/8 wave x 2 5.8dBi • Length: 38" • Conn: PL-259 • Max Power: 60W

COMET B-10 / B-10NMO **DUAL-BAND 2M/440MHz**
Gain & Wave: 146MHz 0dBi 1/4 wave • 446MHz 2.15dBi 1/2 wave • Length: 12"
• Conn: B-10 PL-259 ,B-10NMO - NMO style • Max Pwr: 50W

COMET SBB-2 / SBB-2NMO **DUAL-BAND 2M/440MHz**
Gain & Wave: 146MHz 2.15dBi 1/4 wave • 446MHz 3.8dBi 5/8 wave centerload • VSWR: 1.5:1 or less • Length: 18"
• Conn: SBB-2 PL-259 • SBB-2NMO NMO style • Max Pwr: 60W

Maldol EX-107RB / EX-107RBNMO **DUAL-BAND 2M/440MHz**
Gain & Wave: 146MHz 2.6dBi 1/2 wave • 446MHz 4.9dBi 5/8 wave x 2 • VSWR: 1.5:1 or less • Length:29"
• Conn: EX-107RB PL-259 • EX-107RBNMO NMO style • Max Pwr: 100W

COMET SBB-5 / SBB-5NMO **DUAL-BAND 2M/440MHz W/FOLD-OVER**
Gain and wave: 146MHz 3dBi 1/2 wave • 446MHz 5.5dBi 5/8 wave x 2 • Length: 39"
• Conn: SBB-5 PL-259, SBB-5NMO - NMO style • Max Pwr: 120W

COMET SBB-7 / SBB-7NMO **DUAL-BAND 2M/440MHz W/FOLD-OVER**
Gain & Wave: 146MHz 4.5dBi 6/8 wave • 446MHz 7.2dBi 5/8 wave x 3 • Length: 58"
• Conn: SBB-7 PL-259, SBB-7NMO - NMO style • Max Pwr: 70W

Virginia Beach Hamfest

Electronic Flea Market &
ARRL Roanoke Division Convention

Tidewater Radio Conventions, Inc.

SEPTEMBER 15 & 16
2007
Virginia Wesleyan College
1584 Wesleyan Drive
Virginia Beach, VA 23462

Show open to the public from 9:00 A.M. till 5:00 P.M. Sat and till 3:00 P.M. Sun

Dealer Load In: Friday 5:00 P.M. till 10:00 P.M. & Saturday 7:00 A.M. till 9:00 A.M.

Directions: I-64 to Exit 282 (US 13) North (Northampton Blvd) to the first traffic signal, turn right onto Wesleyan Drive. Go approximately ¾ mile and turn right into the Virginia Wesleyan Campus. The Guard at the Gate will direct you to the Hamfest location.

On the Cover:

Morse Code may no longer be required for Amateur Licensing, but our intrepid correspondent from Virginia, Fred Weaver, KG4BKI, appears to delight in pounding the brass the old-fashioned way. Fred's account of the opening of the new Mariner's Museum in Newport News, and the historic reenactment to celebrate the occasion, begins in his regular column on page 48 of this issue.

Editor Tom, N4IOZ, asked me to do a technical article series for SERA similar to a technical series that I wrote for my radio club about 15 years ago called Arc & Sparks. There were some unusual technical goodies in those, and Tom pointed out that I could basically "cut and paste" them. Some day, when I find the 100-Mb Iomega disks they are on (and something to read them with) I might be able to do that; but for now I'm going to write some new stuff.

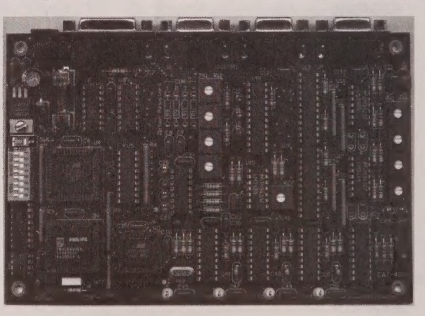
This month I want to show how easy it is to build a simple audio amplifier using the LM386 IC. I had planned something more exciting, but just as I sat down to finish it a family emergency came along and took my time for over a week and the prototype wasn't done. But, no matter, this is something I had on file. This is a simple project and we'll need some kind of audio amplifier for almost everything we build anyway so this is a good starting point. I am in the process of laying out a PC board for this and some other simple circuit kits that will have a lot of repetitive use, and will have the first kits available on my web site, probably within a week or two of this month's publication. Check www.dwepe.com/kits. The entire web site is about to undergo a big change and may be down for a little while, but check back later if it's down.

Of course, this is really easy to whip up without any kits. The kits are a convenience. There are two main options other than buying a kit. One is to get a perforated circuit board from Radio Shack, Digikey or Mouser. But that board can cost more than the entire project, so I did my prototype "dead-bug" style on a little scrap of circuit board. That's the cheapest and fastest way.

The LM-386 is a marvelous little IC. It can operate over a wide range of supply voltages, about 4 volts to 18 volts, and can deliver up to about ½ Watt of clean audio without a heat sink. There are several varia-

CAT-400 Repeater Controller

This controller combines the features of the popular CAT-250 controller and the RLS-1000 Remote Link Switch into a four- port controller ideally suited for sophisticated linking systems.



Features Include:

- Voice Synthesizer ID
- (20) Voice Messages
- (1) Repeater Port
- (3) Remote Base Ports
- (4) DTMF Decoders
- CW Identifier
- DTMF Audio Muting
- DTMF Pad Test
- (40) User Macros
- (50) Event Macros
- (64) Control Functions
- (4) Logic Inputs
- (4) Output Switches
- Internet Firmware Upgrades
- Optional Windows® Editor

Internet: http://www.catauto.com

tions of this IC: the LM386-1 is the lowest power version at 1/4 Watt; the LM-386-3 is the ½ Watt version and the LM386-4 is capable of nearly a watt with the right conditions. They are pin-for-pin compatible. They are available in surface-mount,

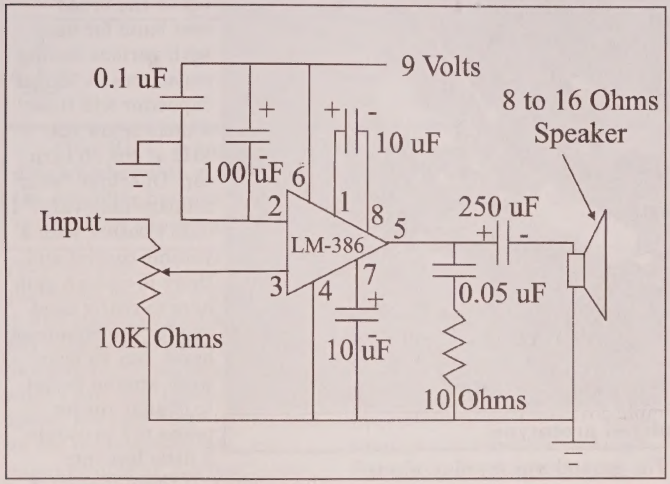

Figure 1: Schematic for an LM-386 audio amplifier.

although I'm going to use the 8-pin mini-DIP package.

The IC's are available from Digikey or Mouser Electronics for less than a dollar each. Radio shack has them but you'll pay probably $3 for the convenience of getting them at the mall. The spec sheet is available at <http://www.national.com/ds/LM/LM386.pdf>. (*Editor's note: You can also try the parts sellers at your friendly, area hamfest!*)

The minimum circuit in the National data sheet needs a few extra parts to work well and those are added in Figure 1.

The diagram above has a 100 µF capacitor from pin 6 to ground and a 0.1 µF from the 9 volt supply to ground. If you leave these out, the circuit is likely to oscillate, especially if you use the high gain circuit. The high gain (of 200) circuit has a 10 µF from pin 1 to pin 8. Adding a 1.2 kW resistor in series with the 10 µF drops the gain down to 50. Leaving pins 1 and 8 disconnected drops the gain to 20. There are times when we don't want as much gain, but for the first amplifier we will need as much as we can get, so we'll put the 10 µF in on pins 1 and 8.

What if you don't have a 10µF capacitor in the junk box? No problem--- most of these values are not that critical. Just get as close as you can. Anywhere from ½ to 2X the specified value is almost certain to work for all the parts, and often 1/10 to 10X will get you by.

There are only a few precautions. Make certain to count the pins on the IC in the correct way. From the top of the IC there is an indent on one end. The pins start to the left of the indent and count going counter-clockwise--- that's from the top. Flipping the IC over for "dead bug" style, the pins will count clockwise from pin 1. Don't forget to observe the polarity on the capacitors. When you connect them backwards they have a nasty habit of blowing up in your face after being powered up for about 10 minutes. It sounds like a firecracker. A most rude awakening, especially late at night when the little aluminum can bounces off your forehead and capacitor-fuzz gets all in your nose, eyes and ears. Don't ask me how I know. Also don't overheat the IC pins. A good soldering iron is a great investment.

To build this circuit took me just under two hours and that includes writing this text; I started at 5 p.m. and it is now 7 p.m. Building the board probably took less than 45 minutes. I drilled two holes in opposing corners so I could mount it later and I wasn't all that fussy about precision measurements. It helps to scrub the board with a pot-cleaning pad before soldering to it. The board I used is about one and one-half inches square.

I just tacked a volume control on the board for testing purposes. I used a function generator to test it - it worked the first time. I plan on using this circuit over and over again for little construction projects in Arcs & Sparks in the next few issues. There are only a handful of parts here, so that makes it hard to get a minimum order

unless there are other things you want to order as well.

Generally, future Arcs & Sparks articles will favor VHF and FM. But try this for giggles: if you have an old crystal set over in the corner, or can whip one up, you will be amazed what you will hear if you connect a long-wire antenna and a good speaker to this after dark. Usually, a crystal set without amplification only works well on broadcast frequencies, but try tuning up to the Short-Wave (SW) bands. I listened to Radio Japan and other SW stations for hours one night and the only amplification came from this little LM386. The sound will fill the room if you use a big speaker. The antenna was a wire run out my shop door, along the building and then along the top of a wooden fence, about 40 feet total and no more than about six-or-seven feet off the ground. The ground was my shop electrical service ground.

A crystal set circuit is very simple. About 100 turns of 24-gauge (or a size close to that: 20, 22, or 26 AWG...) wire on a 2-inch form (PVC pipe works well), with taps at 1, 2, 4, 6, 10, 12, 25, 50, 80 and 100 turns. The taps aren't all that critical. The inductance has been calculated to resonate a little below the broadcast band for use with various tuning capacitors. A 365-pF capacitor will tune a little below 600 kHz at the 80 turn tap. Of course "your mileage may vary." I didn't bother with a volume control and there is enough gain here to really need one for the broadcast band. But an easy work around is just to change the antenna tap to couple a little less into the receiver. If there is enough interest, I'll make some crystal set kits for this - the problem is finding an inexpensive 365-pf tuning capacitor in quantity.

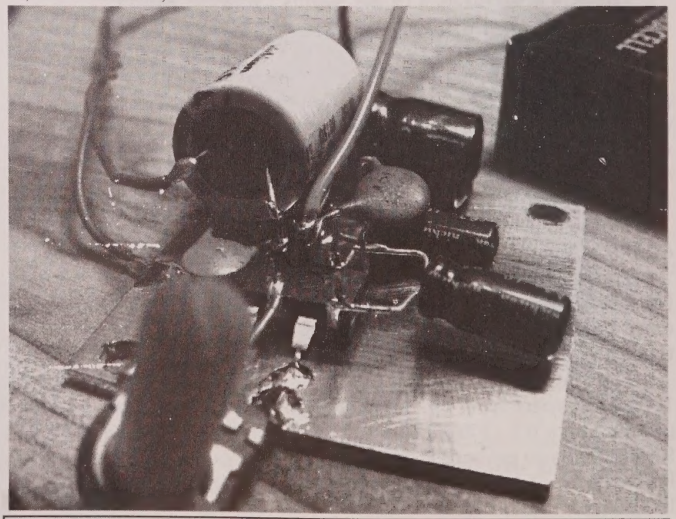

Figure 3: The prototype from another view.

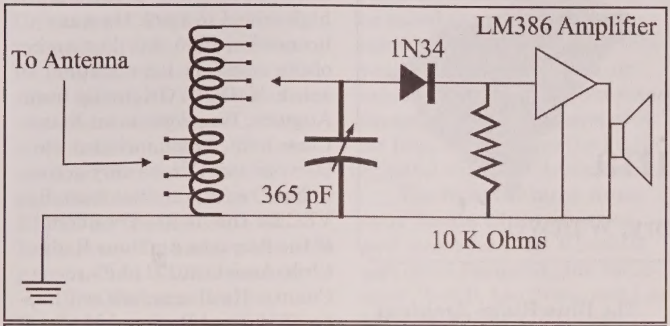

FIGURE 4. A suggested simple crystal set schematic. I didn't bother with a capacitor in series with the audio input since the amplifier had one built in. A 0.01 capacitor across the 10kW is usual but the circuit didn't seem to care either way.

They are pricey to order in small quantities and are a little hard to find surplus anymore. Actually they can be a little hard to find anywhere anymore. I'll see what I can find. (*Editor's note, again: Here's a hint--- if you find an old radio somewhere, you might be able to "harvest" some of the parts that you need. Just be sure that the old radio isn't a collector's item. A broken clock radio or something with a tuning knob--- rather than digital tuning--- ought to be a good bet!*)

That's all for this issue. If you have any thoughts or ideas email me at <ws4nc@sera.org>. See you in the August issue!

73, Don, WS4NC

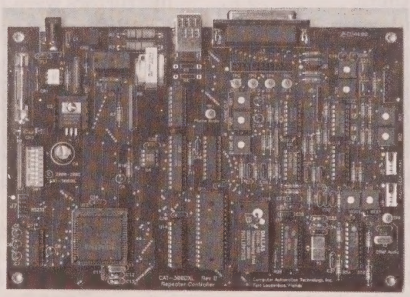
CAT-300DXL Repeater Controller

The CAT-300DXL has all the features of the very popular CAT-300DX including a full feature autopatch and a Remote Base Port.



Features Include:
- *Voice Synthesizer ID*
- *(20) Voice Messages*
- *Real Time Clock*
- *(20) Position Scheduler*
- *Full Feature Autopatch*
- *(100) User Speed Dials*
- *Emergency Speed Dials*
- *Reverse Autopatch*
- *Remote Base Port*
- *CW Identifier*
- *(20) User Macros*
- *DTMF Audio Muting*
- *DTMF Pad Test*
- *(4) Logic Inputs*
- *(4) Output Switches*
- *Optional Windows® Editor*

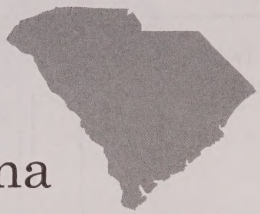
South Carolina



Roger Gregory, W4RWG

Hello South Carolina,

We have had an early spring here in Union. The weather has been very warm. I took a week off the last week in March and worked outside some, played with my granddaughter Madyson a lot, and rested some. We have been real busy with the coordinations of the SC Heart's system repeaters which are supposed to link the hospitals in South Carolina together in case of emergencies or disaster. We are looking forward to the Upstate Hamfest in Spartanburg on Saturday, May 5, 2007. I hope to run two tables; one for SERA, and the other to sell a few items. We always have a great time there.

The **Anderson Radio Club** elected officers for 2007. They are: Jim Hagen, KD4HEY-President; Jeremy Manning, KI4CCZ-Vice President; Jimmy Lollis, WD4BUH-Secretary; Brian Sugden, KR4SP-Treasurer, and Jerry Jordan KD-4PJO-Activities Manager. The ARC holds a net each night on their 146.790 repeater. They average 800-900 check-ins per month. The Anderson hamfest on April 14 was held at a new location this year. The 29th annual event (can you believe that it has been 29 years?) was held at Darwin Wright Park. This is a free hamfest with hourly door prizes. I passed my General test at their fire station in 1996.

The **Blue Ridge Amateur Radio Club** will host their annual Upstate Hamfest at the Spartanburg County Fairground on May 5. The Greenville WCARS VE team gives exams the first Saturday of each month at the Red Cross Building on Grove Road. The contacts are John Chism, ND4N or Sue Chism, N4ENX, <n4enx@mindspring.com>.

The **Columbia Amateur Radio Club** had a Skywarn class on April 2. The instructor was Steve Naglic, of the National Weather Service at Columbia Airport. A recent training class was composed of building a direction finding antenna. The instructors were Roger Arnett, KF4PRV, and David Huddleston, KI4LKG. At the time of this article, the CARC was planning on a statewide ham license class. The dates were April 20, and April 23. I hope this was a success.

The **Florence Amateur Radio Club** recognizes February member of the month Stan Stadig, KI4LLU, who has been a ham since August of 2005. Stan's first exposure to ham radio was way back in 1969 on active duty with the Army in Germany. Ham radio was used to keep soldiers in touch with their family back home. Harry Paxton, W8IXZ, who is the club's oldest member, is member of the month for March. I don't know his age, but he started high school in 1929. He was licensed in 1955. April's member of the month is John Schumacher, N4DOU. Originally from Augusta, Ga., John is an Extra Class ham, which includes the 20 wpm code. He is very active in ham radio activities including VEC for the ARRL, President of the Augusta Amateur Radio Club, Assistant EC of Florence County. He also serves as Chaplin of McLeod Regional Medical Center.

The **Foothills Amateur Radio Club** has 2 repeaters: 2 meters (146.700 mhz PL tone 107.2) and 440 mhz (442.125). The FARC is located in Pickens, SC and their website is located at <www.wt4f.org>.

The **Grand Strand Amateur Radio Club** congratulates Bob Hawkins, KI4HEE, who has received two awards at the 2006 awards dinner. He received ham of the year, and 2006 Net Manager Award. Also receiving awards were Robert Battle, KE4HGB, for his many years as outgoing secretary, and Olen Parsons, W4EZR, for helping with GSARC with the Myrtle Beach City Grant for 2006. The GSARC has a new secretary. James Reiner, KI4JKV, who was the single change in club officers. The new secretary plans to update the member database. Members of the GSARC again assisted with the 10th annual Myrtle Beach Marathon. Over 40 hams from the Southeast assisted with the event.

The **Greenwood Amateur Radio Society** held their annual hamfest in January. It was reported that it was the best that they had had in 11 years. I appreciate the table furnished for the SERA. We had a great day there. I am looking forward to next time. The GARS webpage is up and running thanks

to Jeremy Manning, KI4CCZ. Go to <www.w4gwd.org> and take a look. The club has lost its long time net controller; Ms. Alice Taylor, KC4JWM, has moved to Lexington, SC. She will surely be missed. The new net controller for Thursday night will be Betty Ann Cannon, KF4BVK. Check in with Ms. Betty every Thursday night at 9 p.m. on the 147.165 repeater.

The **Pickens County Emergency Communications Group** has changed their meeting times. The Emergency Operations Center located at 1509 Wahalla Highway at 7 p.m. the first Tuesday of each month. Field Day will be June 24-25 at the EOC building.

The **Ridge Amateur Radio Club** now has a firm meeting place. The RARC will be meeting at the New Batesburg-Leesville fire station #26 located at 537 West Church Street in Batesburg. Interesting items can be found on the club website <www.w4rrc.org>. The Batesburg-Leesville repeater is located on 147.255 with a tone of 123.0.

The **Salkehatchie Amateur Radio Society** is planning Field Day for 2007. The National Weather Service will be asked to present a hazardous weather program again this year. They are also checking into the possibility of Homeland Security funds being available for local use to equip the local hospital with ham equipment.

The **Spartanburg Amateur Radio Club** welcomes new members Dick, KB4GJB, and Julie Fasnacht, Jim Hindman, W4RP, Lee Sims, and Les Macbay, KI4IKH. Congratulations to Mike Bonner, KI4AWC, who passed his General license test. Mike and I have been friends a long time. The SARC will help with the March of Dimes March on April 28. The march will be headed by Jim, W4BQP, and Art, KE4EAN. The annual bicycle assault on Mt. Mitchell will be held on June 11. The SARC holds a net every Monday, Wednesday, and Friday on 147.315 at 8:30 p.m. I see from your newsletter that Fritz, W4NTO, has retired as a tower climber. If it makes you feel any better, Fritz, I retired as a climber too, and after only two climbs up a 50-foot tower. I also read in the newsletter of the death of Malcolm Cromer, N4SEJ. I remember Malcolm checking into our nets and attending our hamfests for many years.

It's just not the same on the Union repeater without folks like Marshall Hodge, W4MLH; Jay Howell, K4KAN; Bill Hembree, W4DBH; David Walters, N4ADW, and Malcolm, N4SEJ who are now all Silent Keys. We surely did have a lot of fun on the radio. I extend my sympathy to Ms. Juanita, N4SEK.

The **Union County Amateur Radio Club** announces the death of David Walters, N4ADW. I extend my condolences to David's family. The hams in Union County will surely miss David. He was always willing to do what he could to help with our hamfests. He spent many nights keeping watch over vendor displays waiting on our hamfest to open. He was also our tower builder and tower climber if we needed work done high in the sky. We will miss David, he was our friend.

The **Union WCARS VE Team** holds exam sessions the 2nd Thursday in January, March, May, July, September, and November at 7 p.m. in the Union County 911 Center training room on North Pinckney

Attention South Carolina Repeater Owners. Are you a SERA Full Member? I would like for you to consider joining the SouthEastern Repeater Association. The cost is only $ 20.00 per year. Send your full membership dues in today. Let's make South Carolina 100 %. SERA needs your support and with full membership not only will you support the SouthEastern Repeater Association, you and your designee will receive the Repeater Journal for as long as you are a full member. What a deal!

The Central North Carolina Traffic Net

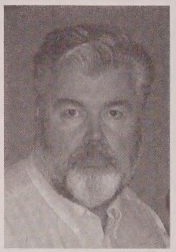
The Central North Carolina Traffic Net (CNCTN) recently reached a significant milestone, meeting every night for the past thirty-five years. The CNCTN is one of the longest-running, continuous VHF Repeater traffic nets in the country.

Check-ins on April 4, 2007, the exact thirty-fifth anniversary, were: Shane, KI4PNL (Net Control); Dave, KE4JHJ (In/Out Liason); Mike, KE4AHC (Net Manager); N4IOZ; KI4TUY; N8CB; W4BHF; KF4GFQ; KU4GW; KB4GKI; K4JIP & K4JQT; KI4DDC; K4SHU; KG4YNM; and W4EHM.

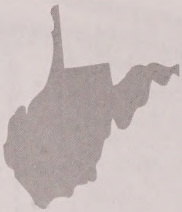
Mike, KE4AHC, also remembered past net managers WA4MNR and K4YJB for their devotion to keeping the net going in the years before he took over.

The net has met for much of its history on the 146.82 MHz WB4PZA repeater in Wilkesboro (previously in Roaring Gap), NC.

The SERA Repeater Journal congratulates the CNCTN for thirty-five years of service on the VHF band, enabling many folks without HF privileges to train and handle traffic.



West Virginia



Richard Clemens, KB8AOB

Greetings from West Virginia

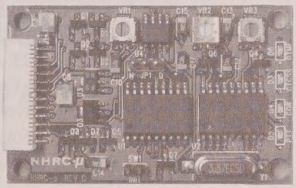
Certainly good to see the weather warm-up after a very cold winter in West Virginia. While we have had a long string of mild winters, the winter of 2006-7 has reminded us just how cold it can be in this part of the country. Fortunately it did not last that long and we are now enjoying warmer temperatures.

NHRC

REPEATER CONTROLLERS

NHRC-μ (Micro)

Ultra-Compact
Repeater Controller/IDer



(actual size 1.25" x 2.00")

NHRC-μ Features

- Repeater Controller, IDer, or Beacon modes
- High and low-going COR and CTCSS inputs
- Extremely compact
- "Intelligent" ID algorithm
- Programmable CW ID speed and pitch
- 21 Control operator settings
- 4 User commands
- 5 Saved setups
- Touch-Tone remote control and programming
- Windows™ based, serial port programming
- Hang timer, ID timer, Timeout timer, and CW messages stored in non-volatile memory
- Jumper-selectable receiver deemphasis
- LED CAS, CTCSS, PTT, and DTMF indicators
- Extremely low power consumption

The NHRC-μ ("Micro") is a compact repeater controller/IDer designed for easy installation in close quarters. The NHRC-μ can function as a conventional repeater controller, as an IDer for repeaters, or as a beacon controller. It can be easily mounted with double-sided foam adhesive tape, and connected to the equipment with flying leads, allowing for easy installation in almost any equipment.

The NHRC-μ is programmable by sending DTMF sequences over the air, or by computer with a serial port connection and the free NHRC-μ programming software. The CW ID, hang time, ID timer, timeout timer and courtesy tone beeps can all be programmed by the user. All programming is stored in non-volatile EEPROM memory.

The NHRC-μ (Micro) (Assembled and Tested): **$119** plus shipping and handling

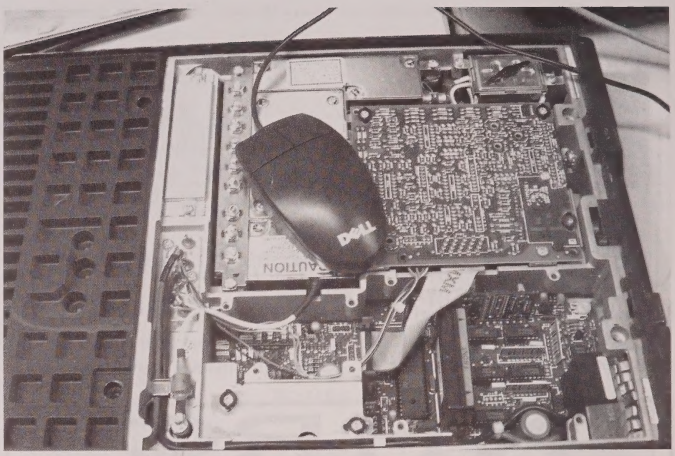
Jonathan Andrew, KC8JDC

The West Virginia Wesleyan College Amateur Radio Club, W8LD, has embarked on a new project for 2007 as we plan to add a local repeater for Buckhannon. We are still early in the planning stages and it certainly has become a learning experience.

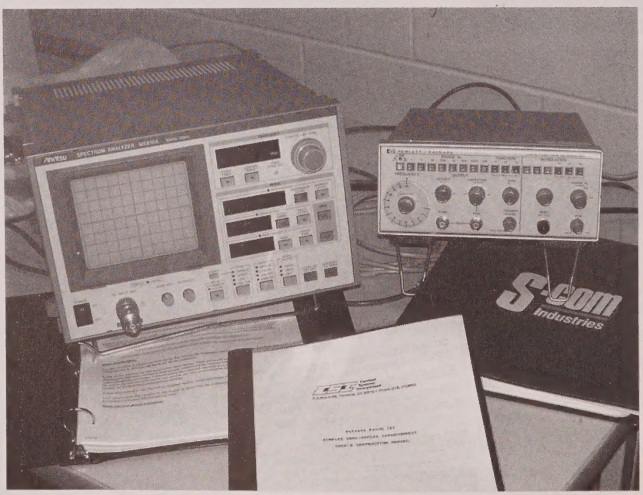
Jonathan Andrew, KC8JDC, was able to acquire several working Motorola Syntor X radios that had been pulled from service along with related parts. As a club project, we are now in the process of collecting the needed information and expertise to adapt these radios for amateur radio use. We have been fortunate in the fact that a wealth of information is available on the Internet to support the conversion to the ham bands. We have also acquired a Motorola training manual, via eBay, that will certainly assist the club in learning more about the radios and help in the conversion process.

It does seem that every step has generated a new hurdle to cross. The first of those hurdles

is to re-program EEPROM chips to fit the new requirements. It just happened that I had an old chip burner stuffed in the back of a storage cabinet that might work. I had used the device many years ago to burn memory chips for PK-88s and other TNCs when I helped established a TCP/IP network in northern West Virginia. At that time (c 1980s), several hams had a wireless TCP/IP link that stretched from Buckhannon north to Fairmont and finally to Morgantown. (Over sixty miles) The Wesleyan College ARC, W8LD, The Mountaineer Amateur Radio Association, W8SP and the West Virginia University ARC, W8CUL, were key participants. With no local Internet access at the time, it allowed a link to the full-time connection at Morgantown for email and the transfer of small files. I remember the days of sending a 30 KB file to Fairmont and having it take days to be complete as our links were not very reliable.



One of the Syntor X radios with a standard computer mouse on top so you can get an idea of the size of these units.



Some of the instructions and equipment as we get ready to retune the radios

But that is another story. Well I found the burner, but where is the cable, and, oh yes, I remember it now, it had a proprietary card that needed to be installed in the computer – certainly no USB back then. I later found the card but, oops, it is an 8-bit ISA card. Some more digging was required to find the software (originally on a 5¼ inch floppy) on a 3½ inch disk. It was in a box of disks that I had not opened for years. So we got the burner, and, yes the software says it will burn the needed chips, but where can we find a computer that still has an ISA slot? Jonathan managed to locate an old unit and at the same time I found an archived copy of the needed software online that I burned to a CD so we did not have to trust an old floppy drive. All this work proved successful and Jonathan has been able to reprogram the chips with the needed information.

Our next step is to retune the radios. While we have found some folks that will do that for a fee, however, our club budget limits just what we have to spend. So you can see in the photographs, we are beginning to assemble the needed tools and instructions and hope to have our new repeater system on the air sometime this summer (after co-ordination with SERA). It has been a slow learning process to this point but we are encouraged with our successes thus far and hope it continues. I will keep you posted with an update in future editions.

Tennessee

Bob Gault, KD4NEC

Joe Riner, WD4DES, presented a program on the NVIS antenna used in disaster communications during a meeting of the Cleveland Amateur Radio Club. The Near Vertical Incident Skywave antenna performs best on the 40, 60, 80, and 160 meter amateur bands. As Riner pointed out the NVIS has been used by the military for battlefield communications for years. Whereas most HF antennas radiate outward toward the horizon; the NVIS radiates straight up toward the ionosphere, facilitating communications over a few hundred miles. Club members also learned about digital modes of communication from Ron Akers, W8BF.

The Cleveland Amateur Radio Club has refurbished its clubhouse - inside and out. The work was led by club president Glen Clayton, W4BDB, and his wife Jean, KE4OEQ, who serves as club treasurer. The building has a new coat of paint and new tables were acquired with funds received through a grant. The grant also bought a new computer and training material. The radio room is now ready to host disaster communications and for club members to do some "hamming" during meetings. Both APRS and packet are additions to the club's communications gear.

From the Delta Amateur Radio Club's Sparks newsletter we read that hams in Memphis with 220 Mhz. capability can join a new net. It is on the 224. 42 repeater on Monday nights at 8:30 p.m. No PL tone is needed. The Delta club's training program under the direction of Joe Lowenthal, WA4OVO, has been busy helping new enthusiasts get their Technician licenses. In February, five students obtained calls and 15 more completed the Technician exam in March. Additionally, one student, Tammy, KI4UHG, passed the Technician and General licenses. A General class was planned for late April and interest is being sampled for an Extra upgrade class this summer.

C.V. Jayne, W4NHT, received recognition from the ARRL commemorating 60 years of membership...

The Chattanooga Amateur Radio Club has set the dates for their 2007 hamfest for October 27 and 28.

Also looking ahead, the Roane County Amateur Radio Club is planning their second annual hamfest on November 17, 2007 at the National Guard Armory in Rockwood Tennessee.

Perusing club websites; it looks like most are getting ready for Field Day, the mid-summer disaster exercise that tests our ability to work without the conveniences we're accustomed to. Field Day is always a highlight of the year despite the fact it usually rains at some point during the 24 hour exercise.

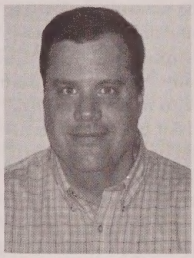
The Amateur Radio Club of Hohenwald has a weekly net on Thursday nights at 8:00 p.m. on 146.895 Mhz. You'll need a 100 hertz tone to access the repeater. ARCH was founded in 2002 by the Electronics Technology Program of Tennessee Technology Center to give students and residents of Lewis County a place to enjoy electronics together.

The Johnson City Amateur Radio Association has noted on their website that C.V. Jayne, W4NHT, received recognition from the ARRL, commemorating 60 years of membership in the organization. Congratulations C.V., that's quite an accomplishment!

The Smoky Mountain Amateur Radio Club had a March program on putting together and setting up a portable repeater by David Hoffman, KE4FGW.

The Lakeway Amateur Radio Club in Morristown has a net on 147.030 Mhz. every Tuesday night at 8:30 p.m. There is also a simplex net on 147.510 Mhz. on Monday nights at 7:30 p.m. and the Greene County Emergency net is held on Monday night at 9:00 p.m. on 145.390 Mhz.

The Bristol Amateur Radio Club's 146.76 machine is getting good coverage reports. Located on Holston Mountain, it has coverage in several states. Recent work on the repeater has improved sensitivity to decrease de-sense. Recent club programs include digital communications and the VHF-UHF bands.



Kentucky

Pat Spencer, KD4PWL

Spring has sprung, and the weather and the topography of the ARRL organization are changing in Kentucky. More on that in a moment, let's take care of business first.

Repeater News:

Kentucky SERA Coordinators have reported a lot of activity this quarter. Coordinations have been granted for the **KD4DZE** 147.030+ (Tone 107.2) in Dewdrop, **KY4LAW** 146.910- (Tone 107.2) in Lawrenceburg, **KR4MT** 444.325+ (Tone 127.3) in Watergap, and **N4KJU** 147.225+ (Tone 127.3) in Paintsville repeaters. Repeaters that are moving, or changing ownership include the **KR4MT** 443.825+ (Tone 127.3) In Paintsville, KJ4VF 147.045+ (Tone 100.0) in Dorton, and **KJ4VF** (formally WB4UBY) 147.165+ (Tone 100.0) in Stanville repeaters.

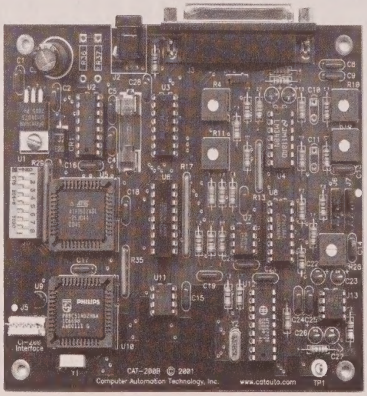
Following up on the February 2007 Repeater Journal Kentucky Column, SERA has granted coordination for the 145.350- (Tone 103.5) located Hardin Memorial Hospital in Elizabethtown, KY. Ron Dodson **KA4MAP** reports now that the coordination has been granted, crystals have been ordered for the repeater and it will be on the air soon.

The Smiling Future of Ham Radio:

Although he lives in West Virginia, word came to me about **James Stamper, KD8EYT, age 9**. Stamper is a member of the **Big Sandy ARC** in Louisa and the **Wayne County ARC** in Wayne, WV. The son of Barry Stamper, AB8UR and Sherry Stamper, AB8US, James is a trained Skywarn Spotter and

CAT-200 Repeater Controller

This controller was specially developed to provide remote base linking operation and a voice synthesizer at an extremely affordable price.



Features Include:

- Voice Synthesizer ID
- (12) Voice Messages
- CW Identifier
- Beacon Message
- Remote Base Port
- DTMF Audio Muting
- DTMF Pad Test
- (30) Control Functions
- (4) Logic Inputs
- (4) Output Switches
- Optional Peet Weather Station Interface *
- Optional Windows ® Editor Program *

* Requires CI-200 Computer Interface

wants to grow up to be a comedian.

Recognition of Deserving Operators:

Each year, Kentucky ARES recognizes the accomplishments of operators who go above and beyond in service and provide a foundation for growth in their local areas. The 2006 awards were presented at the Cave City Hamfest. Because of equivalent achievements, the ARES Operator of the Year was awarded to two operators; **Brian Clark, W4SOU** of Owenton and **Kevin Simmons, KI4JXN** of Owensboro. Clark has completed multiple layers of amateur radio, KY Emergency Management and FEMA training and serves as the "right hand man" of his county emergency management director. Serving as local and an assistant district ARES coordinator, he has facilitated the installation of radios in the local EOC. Simmons, the KY District 3 Coordinator, has worked hard to bring operators and served agencies together. His efforts have been recognized by KY Emergency Management and the Green River Development District. He has placed two amateur radio repeaters in service and facilitated district wide linking efforts to better provide disaster communications.

Three amateurs were presented with KY ARES Lifetime Achievement Awards; **Shelby Ennis, W8WN; Lora Ennis, WD8LPN,** and **Fred Jones, WA4SWF**. The Ennis' have many years of service to ARES in Michigan and Kentucky. Most recently, they provided much needed communications in Hardin County when flooding damaged communications. In 2005, Shelby responded to the Gulf Coast after Katrina. Lora remained in Kentucky handling phone calls with needs in Long Beach, MS. The husband and wife team are a force for ARES teamwork not only in Elizabethtown, but the state. Likewise, Louisa native Jones is a beacon for emergency communications excellence. His tireless efforts in Kentucky's ninth district and neighboring Ohio and West Virginia for so long that many believe he is just "Mr. Ham Radio." With a quiet, respectful manner, Jones elmers all who need help in their amateur radio journey and helps organizations build emergency communications resources. Jones works closely with emergency management agencies in the region and is District Emergency Coordinator. Congratulations to all, and thank you for your great efforts!

KY Has a New SM:

Kentucky has a new ARRL Section Manager in **Jim Brooks, KY4Z**. Brooks sought the office after the announcement by the retiring **John Meyers, NB4K**. He sought the position as an "opportunity to give something back to the hobby, and to continue the further growth of ARRL programs across the state." It is his goal to build upon the successes of his successor. In the first 30-60 days, Brooks expects his greatest challenge to be the same as all new Section Managers, "Getting his or her hands around what the job entails and then filling positions in the Section Cabinet." He feels his most important appointment will be the slot of retiring Section Emergency Coordinator **Ron Dodson, KA4MAP**. Brooks added that in building his new Section Cabinet that many current cabinet members provide a strong service to amateur radio and "if it's not broke, don't fix it. I recognize that I am the new guy on the block,' and I value the input and knowledge that comes with their experience."

On the topic of emergency communications, Brooks feels that there has been a great deal accomplished between the amateur radio community, local served agencies and Kentucky Emergency Management. It is his goal to continue to maintain and strengthen those relationships. "Amateur radio has a long history of service whenever disaster strikes and normal communications are disrupted, and that need continues today. While every ham may not wish to make 'emcomm' the major thrust of his or her amateur radio hobby, I believe that as communicators, hams need to be prepared for the unexpected. Joining ARES is a great way to start." To the coordinators of the emergency communications programs, Brooks offered, "I've always been impressed by the can-do attitude and dedication exhibited by the volunteers in the field organization. It's their hard work that really makes our programs successful. The Kentucky Section isn't the Section Manager, it's the membership and the volunteers who make things happen. I'm always interested in hearing about their success stories and looking at ways to improve our programs."

In addition to emergency communications, Brooks support the "grassroots lobbying efforts of the ARRL's Legislative Action program. Great Lakes Division Director **Jim Weaver, K8JE** has been the driving force behind the grassroots lobbying effort, and it is a program that deserves support here in Kentucky. Our voices need to be heard, and this is a way we can make a difference in Washington." Brooks commented on the expected influx of operators to the hobby due to restructuring, "Newly licensed and new-to-HF amateurs need the same thing you and I needed after we were first on-the-air: Elmering. Few of us entered the hobby knowing all there was to know, and most of us learned from those we talked with, both local and around the world."

"A club is a natural setting for a new ham to learn about the hobby. A complimentary club newsletter sent to a new ham, or a club QSL card inviting him or her to the next meeting can get the ball rolling," he continued. There has been a trend over the past few years of club membership

dropping. Brooks offered advice to both the organizations that have had reduced involvement, and individuals who have made the choice to become inactive. To the clubs, "Identify the reason membership has fallen, and then attempt to address that issue. I believe that regular licensing classes are always a great way to help rebuild and re-energize a ham club." To operators who have reduced their involvement in clubs, Brooks advises, "Hams leave organizations for a variety of reasons, and my suggestion would be for the individual hams to periodically re-evaluate their reasons for dropping out -- and to look for alternatives. This is a big hobby and there are lots of clubs and organizations that would love to have you as part of their group." The message to both is to find the reason, and correct it.

Brooks looked forward to both the future of amateur radio, and amateur radio in Kentucky. Speaking of amateur radio in general, he commented, "Without access to a crystal ball, my best bet (judging from what I've seen happening in the amateur radio marketplace) is that we'll see digital communications continuing to evolve and eventually replace our analog voice communications now in place." Addressing the future of amateur radio in Kentucky Brooks is, "Very optimistic about the future of amateur radio in Kentucky. As a student of radio history, there's one thing I've seen that's a constant in our hobby, and that's change. From the Radio Act of 1927 to the latest move to drop Morse testing, history proves that amateur radio is an ever-changing communications art."

"The largest amateur license class is the Technician class, and with the recent rule changes we'll see more amateurs upgrading and getting on the HF bands. The enthusiasm of the newly upgraded amateurs can be a catalyst for renewed interest in our hobby across the board. Amateur radio will always be something different to every ham. Some hams enjoy DX'ing, others ragchewing, while others use their hobby to support emergency communications. Technology won't change this. In a broader sense, when I think of the term 'amateur radio,' I think of the people rather than the equipment. Amateur radio in the future probably won't look a great deal different than it does today. I expect the biggest changes will come in the hardware and software," he continued.

Concluding on the future, Brooks stated, "I think it's obligation that each of us as hams should help spread the word about our hobby. A couple of years ago I was visiting **Buddy Sohl, KC4WQ**, and the kids in the "Big Project" ham radio class at St. Aloysius Elementary School in Shepherdsville. (Covered in the February 2005 issue of the Repeater Journal) When I asked him why he took on this particular project, he explained simply that 'as ham operators, we should all be required to train our replacements.' It's a great concept I think we all should adopt."

Jim Brooks cannot easily offer his "favorite area" of amateur radio. "To call any particular activity a 'favorite,' as my XYL can attest, there's not much in amateur radio I don't enjoy". Brooks wants to 'pass along 'the radio bug' to as many people as I can." He is, "looking forward to meeting amateurs across the section during the next two years at hamfests and club meetings."

End of an Era:

Having served since 1999 and 2001 respectively, ARES Section Emergency Coordinator **Ron Dodson, KA4MAP** and ARRL Section Manager **John Meyers, NB4K** will have entered retirement when this issue arrives in your mailbox. Over the past eight years, much has been accomplished in Kentucky amateur radio. Both offered reflections on their experiences.

Meyers offered, "Well it has been a thrilling, awe-inspiring six years for me and I hope for you. I truly appreciate each and every member of the Kentucky Section Staff of which I wouldn't have

HI PRO REPEATERS

Hi Pro "R1" Repeater

144 MHz, 222 MHz or 440 MHz

Here is a compact **LOW COST** repeater (less controller) priced at just $699. A 35 watt VHF (2-meter) repeater with a computer controller, voice synthesizer, auto patch, auto dialers, user functions, etc. is priced at $1,179. This is not a kit, but a complete repeater with a two-year warranty. 222 and 440 MHz versions are also available!

Hi Pro "E" Repeater

144 MHz, 222 MHz or 440 MHz

The Hi Pro "E" is the choice if you need a repeater with a built-in power supply, plus room for an extra receiver, transmitter, small duplexer and controller. The front panel provides status indicator lights, a speaker, a microphone connection, control switches, etc. Prices start at just $1,450!

If you need a receiver or transmitter as a board or in an enclosure, we can provide them. These are the same high-performance units that are used in all of our repeaters. All have our new QUALITY AUDIO AND STABLE OSCILLATORS.

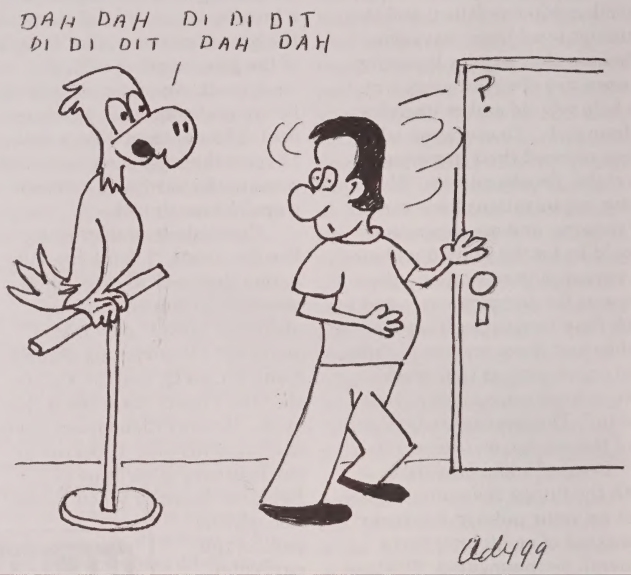
been able to do the job without. To sum it all up, all I can do is thank each and every one of you for the best six years of my amateur life. I will treasure it, remember it, and assuredly never forget it. May God Bless each and every one of you through the coming years. May my sucessor have as much approval and satisfying term(s) as he chooses. I only ask that you treat him as well as I was treated and received."

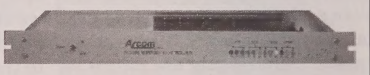
Dodson stated, "It has been a fun, frustrating, rewarding and at times a scary responsibility to be the SEC of Kentucky from 1999-2007. To that I will add, I would not have missed it for the world! As John has said, it will stay with me the rest of my life; every victory and every hardship. So many friends in and outside Kentucky that I made along the way will remain with me in the days to come. Friends I would never had made without amateur radio and serving as SEC! Working together, we made it through Y2K, 9/11, the birth of Homeland Security, countless storms, snows, floods, hazardous materials incidents and waterway spills, became better prepared for earthquakes and terrorism."

For information about amateur radio in Kentucky visit the redesigned KYHAM web site at <www.kyham.net>.



COMMERCIAL REPEATERS FOR AMATEUR USE !

Trade in your old repeater on a new 2 meter, 220 or 440 factory fresh commercial repeater.



With wattages available of 5, 25, 40, 50, 100, 180, or 400 watts of output. Complete packages available that include repeater, full featured computer controller, amplifier, preamplifiers, power supply, circulators, duplexers, cabinets and even hard lines and commercial antennas.

** Our repeaters sound good and hear good **

Technical assistance always a pleasure.

Please come and join our technical assistance reflector on the world wide web (a free service). Information available from licensed E.E.s and P.E.s all repeater, lines and antenna technical issues.

North Carolina

Michael J. Lewis, WA4KE

Since the elimination of the code requirement, several VE's have commented that the number of test-takers and upgrades have increased and each VE group has commented how busy they were once the requirement was effective. Now is the time for each club to step up their recruiting efforts to obtain new members. Many of the new licensees and the instant upgrades would appreciate the invitation to a club meeting or Field Day. A suggestion would be to team up an experienced operator with a new licensee and stage a competition with other teams within the club during Field Day. In addition, keep your club's web page updated for new operators to view. An excellent website to obtain a link to the majority of the North Carolina ARRL affiliated clubs is www.ncarrl.org. Also, a search of ARRL Affiliated Clubs on the ARRL website will help new amateurs to locate a special interest club.

Bill Morine, ARRL NC Section Public Information Coordinator, provided a report from the Charlotte Hamfest and this year's Section PIO meeting. After two consecutive years of hosting the Section PIO meeting at RARSfest, we moved this year to the Charlotte Hamfest and greeted the PIOs from the "Western" part of the state. We had a very productive meeting talking about the newly introduced bill in the NC state legislature, S404, for antenna relief. This piece of legislation is still being worked on to make it more friendly and applicable to hams across the entire state. Once those changes are made, the bill will be made available to PIOs and information on how to how to publicize it. We also talked about ARRL's PR campaign theme for 2007, Emergency Communications, and the new brochure, which can be seen at www.emergency-radio.org. We are recommending that ARRL and other radio clubs and county Emergency Management websites provide this URL as a hyperlink.

Ham Radio and the Uwharrie Mountain Run:

On February 3, 2007, twenty-five dedicated amateur radio operators got out of bed in the early, cold hours before daybreak and traveled to isolated places along the Uwharrie Mountain Trail in the Uwharrie National Forest near Troy, NC. The radio operators set up mobile radio stations and manned them from 7 a.m. until 7 p.m. to provide communications for the annual Uwharrie Mountain Race. The race consists of a 40 mile race, a 20 mile race, and an 8 mile race. The 20 mile race consists of running the trail from the trail head near Ophir, NC at the northern end of the National Forest to the trail head at the southern end of the forest on US Highway 24/27 near the bridge at Lake Tillery. The 40 milers then turn around and go back to Ophir. While the first place finisher may reach the finish line in about 6 hours, the final racer usually does not reach that point until around 7 p.m. Racers come from all over the USA to compete. The proceeds from the race go to support the Land Trust of Central North Carolina, a non-profit organization preserving land for future generations. The radio operators represent three different local amateur radio clubs: the Moore County Amateur Radio Society; the Montgomery County Amateur Radio Society, and The Stanly County Amateur Radio Club. The Ham operators set up at both ends of the trail as well as every three miles along the trail. Their purpose is to keep up with the runners as they progress along the trail as well as notify the race officials if anyone gets lost or injured during the race. For those lost or injured, the radio operators will go out on the trail to find the runner and get the necessary help for them. The operators have been providing communications for the race for the past 20 years, as a public service for events that sponsor non-profit organizations. Email contact for the Moore County ARS is ki4bww@arrl.net; for the Montgomery ARS it is <katana@skyline-events.com>; and for Stanly County ARC it is <kd4ozi@arrl.net>. Contact for the race organization is <info@raceuwharrie.com>.

New Non-Profit Law in North Carolina:

George Fryer, KI4KK

Amateur Radio is supposed to be "just a hobby" but our activities frequently require the support of an incorporated entity. Incorporation helps to

limit the liability of individual club members and allows an organization to own property, open bank accounts, buy insurance, and apply to the IRS for tax exempt status. A new law in North Carolina offers non-profit groups an easier and less expensive alternative to formal incorporation. The "Uniform Unincorporated Nonprofit Association Act" became law in January 2007 and has also been passed by 12 other states. This act provides a less costly and faster path to forming a club than setting up a corporation, and at the same time provides the association with property ownership rights and protection of the members concerning liability. The requirements are simple: At least two persons are required to form an association. An affidavit must be filed with the county clerk of courts ($5.00, like a deed) specifying the name and address of the nonprofit association or club and the fact that the association is a non-profit. You must also provide the name and address of a person or "agent" authorized to receive real property (i.e., gifts, donations, dues) and legal documents. Compared to the $90.00 fees for articles of incorporation and search for full incorporation, this is a much easier path. So what's the downside? The act is new and untested in a court of law. Hopefully a small radio club with few assets would not be a target for any such test. The association cannot be set up as perpetual and it expires in 5 years unless the appointment of agent is amended ($5.00).

You will also need to apply to the IRS if your group wants to become a 501(c) (3) organization that can receive tax-deductible donations. Of course, it's always a good idea to consult a local attorney for advice. There are also some good resources available from the North Carolina Center for Non-Profits at <http://www.ncnonprofits.org/>.

Dick, W8HYD, became a "Silent Key" Monday afternoon, 2/19/07, at age 65. Dick was a long time supporter of Amateur Radio and RARS, most recently serving as Vice-President and President. RARS will be making a donation to the Dick Bitner Benevolent Fund.

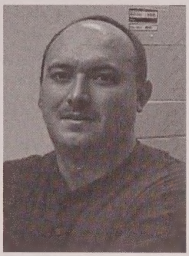
New Business: Alan Bradley, KD4IUN, of The Greensboro Amateur Radio Association, spoke about an upcoming soccer tournament on Memorial Day weekend and he is looking for volunteers. <info@w4gso.org>.

Who won the NC QSO Contest? By the time, you read this article, you will be able to go to <www.w4nc.org> to find out. Should be a slugfest between the Crude Dudes, Brightleaf Boys and Randolph Rowdies. I am waiting to find out.

The Randolph ARC is planning a special event station and will be operating from the North Carolina Aviation Museum and Fly-In.

Participants at the ARRL Section meeting in Charlotte. Tammy Livingston, KI4PTJ, new South Carolina PIO; Paul Robinette, KD4OZI, Western Branch ARES® ASEC & Stanly County PIO; Paul Williams, K4PJW, Gaston County PIO; Bill Morine, N2COP, NC Section PIC; Tim Slay, N4IB, NC Section Manager; and Dave Wentzel, KD4ITI, Mecklenburg County PIO

I would to acknowledge the emails, the newsletters and updated websites that I use to obtain news for this column. Without each club's editor, this column and job would be tougher. As long as the editor has the space, we can keep printing the news. Send news, updates and event notifications to <wa4ke@sera.org>.



Get The Hammer!

... and let's get technical

Randy McKenzie, KK4EJ

New Toys!

Next time you visit a ham-fest or electronics store with your buddy, watch his eyes! You'll notice a glassy look, combined with a soft smile that turns to a larger grin when they find something they like, want or THINK they need. I've done it, you've done it, we've all done it! For me, I also do it when I am at a model railroad show (same as a ham-fest but all trains). I recently enjoyed a train show in Hickory, NC with my railroad buddy, Marty.

Radios, electronics or trains, we all get that little kid feeling when we check out the new stuff, seeing the latest from the factory, even dreaming a little bit of how we would operate that new super duper HF rig, or how small that new HT is, or how I would repaint that SD40 locomotive.

Sometimes I just enjoy being a kid again!

Now my work is providing new toys too! VSP is in the process of upgrading to a new statewide radio system, many of you have already heard about "STARS". The design of STARS is to combine all of the State agencies into a VHF trunking system, providing multiple talkgroups and other features to a local, division and even statewide radio network. The system is already being installed and brought online, and will create an entirely new world for me as a Field Tech.

The "new toys" they have already handed me are: a VHF portable, a new laptop computer, and a trip to Motorola School in Schaumburg IL! Coming soon is a new radio system for my truck and new repeater sites!

... experience is always a good teacher...

I hope to write a feature article about STARS in the future, once it progresses more and gets online. I know many of you are curious about STARS.

For me personally, I almost feel sad for the old system. It's like a old friend, I know the tricks to bringing back my 30 year old base stations, how to bypass a fussy analog microwave MUX card, or how to modify something inside the car for the Troopers. But then again, my old friend is getting tired. Finding parts for some things is nearly impossible now. High voltage transformers are very rare, reliable tubes, even a reliable crystal can be hateful to find....but we keep the old friend going!

When Virginia purchased the Aerotron system, it was the "state of the art" for the day.

I've spent half my career with my old system. I've grown up seeing that old system in my dad's police cars, knowing the equipment, finding its tricks

Anything interesting happening at your next club meeting?

available only on DVD VIDEO

and sweet spots.

The next half of my career will be the new system. Learning how to be more of a IT Tech than a true radio tech. My favorite yellow "tweeker" will be replaced by a laptop, and the old tricks used probably won't work on the new toys. New radios, new microwave, new digital gadgets, mobile data terminals, digital this and that..... all combined into a new system, doing incredible things, providing everyone involved with communications, and once again placing Virginia with a "state of the art" system.

So how much of my experience will translate over to the new system? Time will answer that for me. BUT, experience is always a good teacher, and hopefully I can use some of my hard-learned lessons and stay ahead of problems with the new toys....

Lesson # 4:
All things work better plugged in.
Lesson # 3:
All things work better turned on.
Lesson # 2:
All things can be broken.

And of course, last but NEVER least:
Lesson # 1:
If all else fails, hit it again, you can never have a hammer big enough!!!!! Anything over a 9-pound sledge IS a precision alignment tool.

Take care till next time! God Bless!

Mississippi Continues:

Young Ham Gets Taste of Space

This last item just caught my fancy. I realize that there has not been much talk about repeaters or their owners in this month's column, but I just don't get much news from those entities, so I report what I like to. This I just found interesting and fun to mention.

Kevin Ready, N5KLR. (we will call him "killer"), has had his license since February. His dad is the famous Jimmy Ready, N5LRQ, repeater guru extraordinaire. Neither of them had played with satellites before. But just happen to be playing around looking for them with a quarter wave and found that they could hear them. Listening to A0-51 with the ¼ wave whip could only allow them to hear a short portion of the high angle pass. So they hooked up a 6 element Yagi and noticed a great improvement on 440. They then could hear the bird for the entire pass so they went on and added a homemade 3 element 2 meter Yagi up link and diplexer. Now they work passes down to the 20 degree elevation with just a HT. Kevin has logged contacts as far away as Mexico, California, and Puerto Rico. Way to go Kevin! You will have to bring your set up to the area club meetings and give a demonstration.

Well that is it for this month; hope to hear from y'all soon. Keep the newsletters and emails coming.

THE SERA OFFICIAL REPEATER INDEX

REPEATER LISTINGS FOR: GEORGIA ■ KENTUCKY ■ MISSISSIPPI ■ NORTH CAROLINA ■ SOUTH CAROLINA ■ TENNESSEE ■ VIRGINIA ■ WEST VIRGINIA

IMPORTANT NOTICE: The SERA ***Repeater Journal*** is Copyright 2007 by the SouthEastern Repeater Association, Inc., the officially recognized Amateur Radio Repeater Coordinating organization for Kentucky, Georgia, Mississippi, North Carolina, South Carolina, Tennessee, Virginia and West Virginia.

The SERA ***Repeater Index*** may NOT be published or reproduced, in any form, by any individual, publication, electronic source, or any other means, for distribution without the expressed written consent of the SERA, Inc. All other rights reserved.

SERA will not be responsible for incorrect or omitted listings. The responsibility of correct listings is that of the actual repeater owner or sponsor. SERA makes every effort to keep the index as accurate as possible with information provided. The SERA ***Repeater Journal*** repeater lists contain certain repeaters which are NOT or have not been coordinated by SERA, or are not operating according to recognized frequency utilization plans. SERA does not necessarily condone or recognize such repeaters as being legal or illegal. They are listed in our indexes primarily to keep our readers informed of all repeaters known in the areas served by The SERA.

Some repeater owners or sponsors allow voice as well as other functions on their machine. Operators should check with owners for additional information about what is allowed, and what features are available. Digital Repeaters with normal input/output (pairs) are listed in the regular FM repeater index. Digital systems operating simplex are not coordinated by SERA and are not on our repeater lists. The codes column contains the tone or access code for those repeaters which the owner or trustee has given us written permission and asked that we publish them . Access tones are listed for the reader's convenience both in the By-State, and the By-Frequency listings.

Entries with "#" in front of city indicates repeaters added to this index that have not been coordinated through the local SERA state coordinator. Owners may work with their coordinator to get this indicator removed. Repeaters that have been coordinated but may not yet be on the air yet are listed with "PROP" in the codes column. Owners should notify SERA when on the air.

Repeater owners are reminded to contact their local Frequency Coordinator for assistance in coordination, changes in their listings, or any other requirements. All SERA services are FREE. It is very important that the annual SERA repeater datasheet, sent to all known repeater operators, be accurately updated each year and returned to SERA.

SERA RECOMMENDED FM VOICE SIMPLEX

PLEASE NOTE

The Repeater Journal lists subtones used on repeaters ONLY if they are requested to be listed by the sponsor or owner. The listing of a subtone on any repeater does not in any way indicate it being a "Closed" repeater. Generally in most cases, the tones are used to eliminate noise problems and are listed at the owners request for users convenience.

PLEASE NOTE

The Repeater Journal lists subtones used on repeaters ONLY if they are requested to be listed by the sponsor or owner. The listing of a subtone on any repeater does not in any way indicate it being a "Closed" repeater. Generally in most cases, the tones are used to eliminate noise problems and are listed at the owners request for users convenience.

David Bower, K4PZT

Remembering the Early Days of Six Meter A.M.

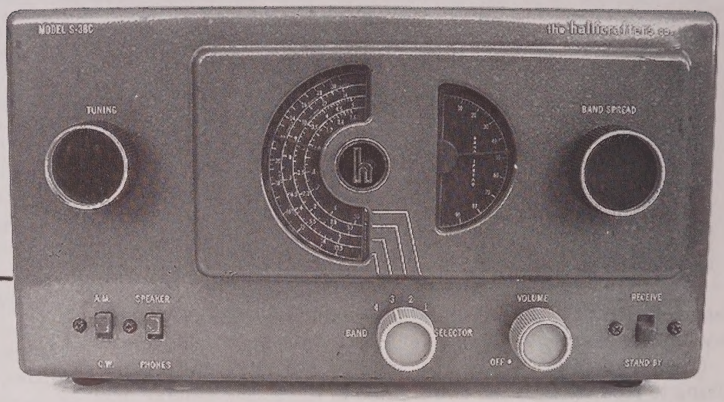
Several years ago, I was talking to KE4XM (Ray) on two meters as I headed for home. For some reason, the conversation migrated to discussion about six meters. Both Ray and I swapped stories about operating six meters years ago; Ray operated out of Vermont, I operated from East Tennessee. In any case, there were similarities. Both of us had operated in the period around 1960. Ray had once operated a Clegg Venus on six. For those of you who remember, the Venus was capable of operating 85 watts PEP on SSB, a lesser amount on AM, and, of course, CW mode. I had operated a progression of home-brew rigs based on 2E26 and 6146 tube technology.

My first real six meter rig consisted of a 6U8 oscillator-doubler driving a 2E26 final. The first section of the 6U8 served as an oscillator using 8 MHz (MCS then) crystals operating on the third overtone. The second section served as a doubler to get the signal up to six meters. The modulator consisted of a 12AT7 speech amplifier coupled to a 6V6 audio power amplifier. This was connected to a plate modulation transformer. The receiver was a common broadcast AC-DC radio using an International Crystal FCV-1 converter to receive six meters.

My first antenna was a ground plane followed by a

A typical six meter station from many years ago had many components. In this example, a separate transmitter and receiver are shown, along with accessory items such as an external VFO, SWR meter, converter, and a low pass filter to "minimize" TVI (television Interference). Also, shown: A high impedance crystal microphone for voice, and J-38 key for CW. The external power supply and modulator for the transmitter, a needed item, is not shown in this picture.

dipole. I would later graduate to a homebrew 4 element beam, followed by six element wide spaced Yagi. There were no repeaters then, so all contacts were direct. Without the benefit of repeaters on mountain tops, the quality of communication depended upon antenna gain and height. While I made a number of good local contacts, DX was much more difficult.

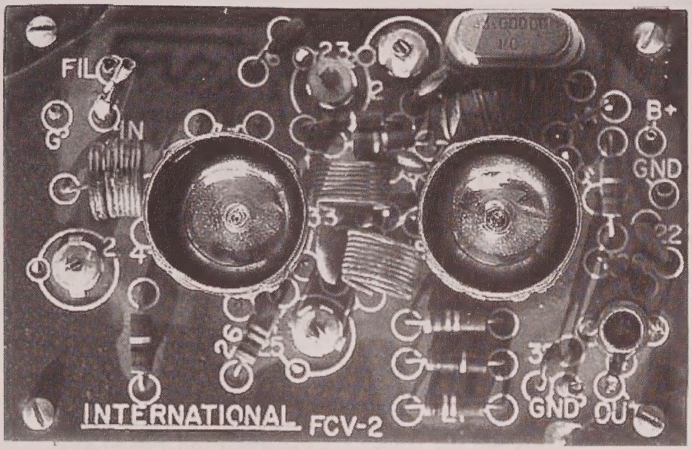


A close-up of the Hallicrafters S-38 receiver.

My first DX on sporadic-E skip, from "five land," was Texas. He gave me a 5x7 which was OK, but not on par with others in my area. I even heard a LU3EX in Argentina (on F2 skip), but did not work him. Still not being satisfied, I sold the 2E26 rig to pay for my car insurance and built a better transmitter using a 6146 final. This rig would run all of 40 watts (input), and I used a much improved audio modulator consisting of a 12AX7 speech amplifier driving a pair of 5881's (high quality 6L6's), class AB1. Again, a plate modulation transformer was used. In all, I had seven dollars invested (five of which was for the modulation transformer).

Many six meter rigs were crystal controlled, and I wanted the flexibility to be more frequency agile. After locating a WW-II surplus ARC-5 transmitter, I converted the unit to a VFO for my rig. Basically, removing one of the two 1625 output tubes (12 volt version of the popular 807), running low voltage DC on the plate, and installing a voltage regulator tube was all that was needed. I had graduated to

A Gonset Communicator-III, popular for six meter mobile and base station operation. Note the various tuning controls and meter for alignment. The SO-239 coax connector is at the top center, near the back of the unit. It used a 2E26 RF final and was crystal controlled. A switch permitted the desired crystal to be selected. The Gonset could operate on either 117 volt AC power, or DC power when mobile.



An Internal Crystal FCV-2 converter for six meters (a top view). This is the same type I used for many years with my receiver.

culture, six meters provided the best of two worlds. When skip was not present, it was a great band for developing personal friendships locally (much like two meters is today). However, when elusive factors that precipitated propagation occurred, it became the exciting world of DX that many of us scurried to sample. You know, in retrospect, six meters became the "magic band" as our experimentation and discovery allowed us to sample the many facets of this magnificent band.

a Hallicrafters S-38 receiver, and soon replaced it with SX-25. The converter was changed to an International Crystal FCV-2 using the 7 MHz (MCS) band as a tunable IF. With all this, an improved antenna was in order and I soon had a six element wide spaced Yagi up in the air. This combination was great and I was really percolating now.

Many years later, six meters was described as the "magic band." We did not really view it that way then, we just knew it as a band that was very good for local contacts, had the excitement of sporadic-E skip openings, and when the Sunspot activity was up, would easily support world-wide QSOs. Many DX signals were strong and the band held the mystery of what contacts would come next. While I do not recall any meteor contacts, I do recall aurora skip (with the typical signal flutter) and extended ground wave contacts due to ducting or some other phenomena.

Mobile was popular on six also. Because most fixed stations were horizontally polarized, the halo antenna became the radiator of choice. As a

Let's Look At It--- This Way !!!

Marvin Whatley, AA4YW

If a Man Answers...

We have probably reached the point in our social evolution where effectively every contributing member of our culture has been dealing with automatic telephone answering menus all of his life. If I live another dozen or so years I may eventually get comfortable with them. I think I have already figured out the underlying strategy and why a business might find it advantageous to employ such a contentious device.

The first and most important purpose is to put the caller in his place. He recognizes immediately that he is dealing with a no-nonsense company that doesn't waste time on useless dialogue. He must realize that the company is setting the rules for this conversation and he must submissively comply or he has no chance. When it is understood where the real power lies and who is in charge, he may tiptoe into the engagement. The menu will start with a simple choice: "If you are a new customer and wish to make a purchase, press 1." I have found this sort of opening even with establishments that virtually have nothing to sell. If you did want to buy something, you're probably not interested in making a purchase until you have cleared up a few things so you're not sure that's where you belong. But if you anticipate that this is as close as you are likely to get and press 1, it doesn't matter because that just puts you onto another menu, so I will skip this. The next question is more cryptic, "If you are part of the Austin group or wish to join our discount plan, press 2." Since you have no idea what the Austin group is and know nothing about their discount plan you ought to skip this.

"If you have wrongfully received a rebate from customer service, press 4."

The next few questions are to wear you down. I should note that the options are coming pretty fast because, as I mentioned earlier, these are busy folk who don't waste time and you are presumed to be an intelligent, high tech person who is fluent in the common terminology of their business. "If you are responding to the 2006 performance survey, press 3." "If you have wrongfully received a rebate from customer service, press 4." "If your purchased item experiences intermittent interrupts, press 5." By now you are beginning to lose confidence that they are ever going to get to your purpose in calling. This is almost certainly the case but they are going lead you down a few blind alleys before it is clear. You might bite on the one: "If you wish to know about our customer service, press 6." "Aha," you say, quickly pressing 6 before the menu goes on to the next choice. There is a slight pause before a recorded male voice explains, "Our customer service has been evaluated by the international reviewing panel and rated among the ten best in our region..." After a minute or two of extolling their record there is a break. Another voice, female now, thanks you for this call and disconnects you. Staring at the dial-tone-emitting object in you hand, undaunted, you resolutely press redial thinking you will do better this time.

Now you are more experienced and let the options whiz by until, close to the end, there is hope: "If you wish to talk to one of our representatives, press 8," which you do. There is a pause, maybe a little whir of sorts, and a voice not quite mechanical says, "All of our representatives are busy at the moment, but if you will hold we will get to you shortly." Then they play bad music. After about ninety seconds the music stops and a recorded female voice in a not too convincing but well rehearsed tone explains, "Your call is very important to us. We are sorry ... please continue to hold." More bad music. Every ninety seconds thereafter she returns with the identical

message to reassure you how important the company thinks you are. After an interminable time, when you are reconsidering whether there was something on that menu that might have been a better option there is a break in the music and what must be a live male voice comes on to apologize for making you wait and asking what he can do to help you.

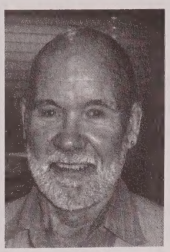
You, of course, have had a lot of time to think about how you will phrase your question and have been struggling with the suppression of building anger so you very carefully start in. "No." interrupts the voice, "what category ...?" He has some questions for you first; it is essential that he put you in the correct grouping. After this exchange he understands the sort of help you need and you are encouraged. But as you start again he again interrupts, "What is you name?" Then your address, then your zip code, then your telephone number, then your customer number... "Your customer number?" Don't you have a customer number?... Or maybe it is an order number, or a serial number of whatever. There will be more questions but I believe he is still forbidden to ask your social security number, your ethnic background or your sexual preference. If you are very unlucky he will have to transfer your call to another number (with a menu).

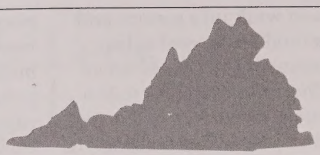
Fifty or so years ago businesses had a particularly silly maxim: "The customer is always right." That was when you could walk into a store and there would be several sales girls asking if they could serve you. The store manager (often the owner) would be not too far away and pleasantly smiling. In today's super stores you are on your own. You push your cart along following the procedure that customers are expected to follow and if you don't see what you want, that's too bad. With sufficient diligence you may find someone stocking the shelves and (with appropriate apology) you may ask him about an item. He might know or he might tell you (without apology) that they don't stock that. If you have stumbled into the little enclosure where the manager hides he may explain to you that no body uses that any more, with implications that you must be some kind of retro. When you have compromised and settled for what they have, you wheel your cart to the checkout line. There may be several "not open" lines because the management closes enough to keep at least five people in the ones that are open.

"Your call is very important to us. We are sorry ... please continue to hold."

The cashier will not look at you. You are to her a unit to be processed. If she is engaged in conversation with another worker she will not interrupt this conversation but will by various gestures indicate what you, as the intruding customer, are supposed to do. If she inadvertently admits that you and she share any common attribute of humanity she loses several points in the ill understood universal game that we all are playing. This behavior seems to have pervaded virtually every business that deals with the public. After the cashiers became mechanisms it was easy to replace them with self-checkout lines. Now you can do all your shopping at the superstore and never interface with a person. Sometimes a superstore hires a person to stand at the entrance/exit to subject you to scrutiny, perhaps to assess whether you are a qualified customer. This individual may greet you with "good morning", but the voice sounds alarmingly like the one that assured you that your call was important. The public has become accustomed to this which may explain why there is no general revolt against the telephone-answering menu.

When we work with computers there are menus. In early conversations with people who developed (and sold) computers I would point out useful things that the computer could do that weren't on the menu. The usual response was, "but nobody wants to do that," and I was chastised for wanting to do the wrong thing. I dislike for people (and more for machines) to tell me what I should and should not want. Nonetheless, in high-level computer applications it is unreasonable to expect meaningful response outside of the design specifications. Businesses are different. One should be able to approach a business and ask a person directly if such and such is within their purview and get the simple response, "we're sorry, but we don't do that," if that's the case. I've never seen an automatic phone-answering menu that made provision for this important simple type of question, and until one is developed, I will continue to resent them.





Virginia

Fred Weaver, KG4BKI

NERPC

There's a new acronym in town – NERPC, the National Emergency Response Planning Committee was created by the ARRL Board of Directors at its 2006 Annual Meeting. Its purpose was to provide recommendations to the Board relative to a national level response to emergency. As the committee's report points out, there is no ARES organization above the Section level. The complete 28 page report is at <www.arrl.org/announce/reports-2007/january/NERPC-32aa.pdf>.

I have reviewed the complete document and all amateurs involved in emergency communications are encouraged to do the same. What follows here will, hopefully, pique the reader's interest enough to download the complete report.

The report makes eight specific recommendations related to messaging, multiple references to training and a number of admonitions related to the notion that business as usual is not good business for amateur radio. Additionally, they make recommendations relative to credentials, international response, mutual aid agreements between sections, and much more.

Messaging: The report describes the three phases of communication necessary for effective messaging; origination, transport, and delivery. The eight recommendations relative to messaging address all three phases. Here are a few things in the report that caught my attention:

1. "The establishment of semi-automatic networks should be considered a priority for surviving and mutual assistance resources, but never to the exclusion of voice networks. Forward-based....equipment should include provisions for all modes of message transport possible, including voice, NTS-Digital, Winlink 2000, WiFi, and others that may be developed in the future." (Page 4)

2. A plan for the deployment of a semi-automatic network was developed by the ARESCOM committee. (See that plan at <http://www2.arrl.org/reports/2004/july/arescom.html>. The ARESCOM report recommended, in part, "the Board endorse the use of Winlink 2000 in the ARES Field Organization.") NERPC indicates little progress has been made relative to the ARESCOM proposals and recommends ARRL Headquarters provide leadership and direction to the committee that was established to implement ARESCOM's proposals. (Pages 4,5)

3. The NERPC report indicates that "A continuing education course on the installation, configuration, and use of the Winlink 2000 system is desperately needed." (Page 5)

4. It is recommended that, "The existing ARRL Radiogram message form should include provision for an E-mail address to facilitate the use of semi-automatic message transport and delivery systems."

5. "It must become and remain a perpetual priority for the ARRL and ARES to enhance training in basic message handling, particularly with respect to message accuracy through the major communication phases of transport and delivery."

NERPC then goes on to discuss the advisability of a national exercise to the NTS system. It was notable that the ARESCOM report mentioned above recommended "integrating ARES and NTS into one unified emergency communications team." (Page 2 of that report).

Comment: Formal message procedures are not limited to NTS. The accuracy of formal traffic procedures should be used anytime the message is going to be relayed and when accuracy is essential to the message.

Three of the committee's eight messaging recommendations involve Winlink 2000. One of the weaknesses of an email message compared to traditional messaging is in the area of message delivery. An email sent is not the same as an email read nor is delivery to the person confirmed!

Training: Two, the messaging recommendations mention training related to Winlink 2000 and in basic message handling. NERPC also says "Field Operators" to be included in the national database now being developed, "will be expected to have completed the following courses:

- ARRL's ARECC Level 1
- Red Cross combined course in Adult CPR/First Aid Basics
- Red Cross online Introduc-

tion to Disaster Services (www.redcross.org/flash/course01_v01)

- FEMA IS-100 (Introduction to Incident Command System)
- FEMA IS-200 (ICS for Single Resource and Initial Action Incidents)
- FEMA IS-700 (National Incident Management System" (Page 7)

Additional training would be expected of those in a position to supervise field operators. (Page 20)

Times have Changed

Here are several of the admonitions that warn against the maintenance of a business as usual attitude. It is notable that the report contained numerous comments along this line. I quote from the report.

"Given ham radio's dependency on emergency communications as our reason to exist in this country, it would be suicidal to assume that what we have always been able to do, at the speed we have always been able to do, will be just fine to maintain our relevance into the indefinite future." (Page 3)

"Today when Americans are accustomed to the rapid throughput and high accuracy of Internet communications, the challenge to Amateur Radio messaging is logarithmically greater." (Page 3)

"The era when individual Amateurs could simply show up in a disaster zone and make themselves useful has been over a lot longer than some Amateurs accept. In the present climate of concerns about security and requirements for formal training, served agencies' expectations drive ARES emergency communication preparation more than ever before." (Page 12)

"(The committee members') common experience…is that the overwhelming majority of licensees may give lip service to emergency communications – especially when they want to persuade neighbors to accept their antenna installations – but are not active in ARES, RACES, Skywarn, SATERN, or similar organizations even in the immediate aftermath of the disasters we have observed over the past five years. The reality is that too few will prepare, even in the highest-threat areas." (Emphasis mine, Page 19)

As mentioned, the committee makes recommendations in many areas of emergency response. I again urge the downloading and review of the complete report.

Opening of Monitor Center
The Mariner's Museum
March 9, 10, 11 2007.

I've been a student of the Civil War for some time. My Great-Grandfather served in a New York infantry regiment along with a Great-Grand Uncle who was killed at Gettysburg. I have followed the progress of the recovery of the Monitor's turret from the beginning. (The recovery of the Confederate submarine Hunley was also of great interest, and visiting Charleston SC to see that vessel was a very rewarding trip.)

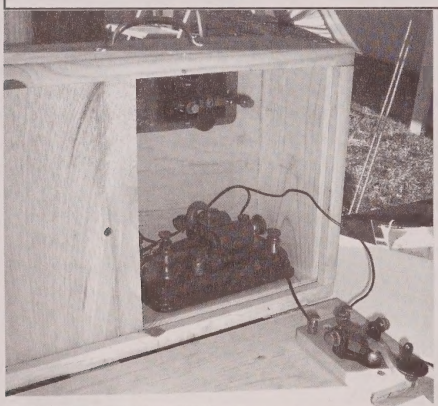
So when Cindi Verser, AI4OO, a Mariner's employee, proposed an Amateur Radio special event station, K4M, to help celebrate the opening of the Monitor Center, I began an email correspondence with her that resulted in a behind the scenes tour of the Monitor display on Monday, March 5, before the official opening. We did have to step over some workmen who were putting the finishing touches on some of the displays.

Cindi described her participation in the development of the display and in the production of one of the recordings. When we viewed the lab where the turret is being conserved, she described having the opportunity to touch the genuine article and what a thrill that was.

Hams from several clubs were involved in setting up and operating the wireless station K4M. Initially, I thought that

Virginians capture the Monitor! **Fred Weaver, KG4BKI; Bill Runyon, WF4R; Cindi Verser, AI4OO; Chris Hosman, KC4F; Leo Kusuda, KG4PWC; (Unidentified member of the Chesapeake Club)**

Bruce Powell KE4GFM tappin' brass at the base station during the Civil War re-enactment that was part of the opening of the Monitor Center. He is being supervised by the 'training officer', John Schultz.



Field station. From top down, Sounder, Relay, Key; all equipment is proper Civil War era.

is what I would be doing, but Cindi said the re-enactor doing the telegraph station had asked for some help setting up on Friday the 9th and I said I would help with that.

I returned to the Mariner's on Friday, met John Shultz and his kids, Jessica and John. All three were in Union Signal Corps uniforms. I helped string the wire through the trees and on poles from the "main" station near the front entrance to the "field" station on the other side of the building.

John has mounted authentic, original keys, relays, and sounders in boxes that made the set-up pretty straight forward. He explained that there was no documentation about how the original equipment was stored and transported as pictures of original stations showed the individual pieces just sitting on a table.

Electrically, the stations work as the originals did: DC to ground. A single wire runs between the two stations. The main station has the 'main' battery. Originals were about 60V. We used a 12V car battery disguised in a box that represented an original battery. Everything is in series. The relay separates the main battery from a 'local' battery. So, the keyed signal operates the relay, the relay switches the local battery to operate the sounder. It is your basic electro-mechanical amplification. The sounder makes a big noise compared the relay and allows the operator to hear the signals over the noise of battle!

On Saturday, I returned for an afternoon of signaling. For sending and receiving we used the Myer's code. This is a two-element convergent code of the type used for wig-wag flag signaling. Instead of wig and wag, we used one click and two clicks. Each letter and number is represented by ones and twos. For example, HELLO is sent as, 211/21/112/112/12/333. The backslash represents a pause and the threes are the prosigns. One 3 is end of word. Two 3's is end of sentence, and three 3's is end of message. It is pretty easy to use and I was soon sending – GENERAL COMMANDING REQUESTS CASUALTY REPORT, reply – NO CASULTIES. Kids took interest in it and several did a great job of sending messages on the wire.

John loaned me a Confederate jacket and a kepi. (A kepi is one of those Civil War caps with the rounded top.) He is part of a group of re-enactors called Signal Corps of the James. They portray both Union and Confederate signal operations. He kept telling me how good I looked in the uniform and invited me to participate in future events

BTW-Readers will have to decide for themselves on the 'looking good' part. :o)

The Big Party Line

On March 22, 2007, an emergency communications training net was conducted in southeast Virginia. A report of the net, with pictures, is posted on www.aresva.org by Joe Safranek, K4JJS, who was NCS for the test.

The March 22 net that resulted in 12 separate repeaters connecting into the 'hub' repeater – Glouster (145.370) grew out of an earlier successful dem-

KG4BKI tappin' brass at the field station during the Civil War re-enactment that was part of the opening of the Monitor Center.

onstration that had connected Smithfield (147.195) to Glouster using the remote base system on the Smithfield machine. Check-ins from North Carolina via Smithfield sparked the idea for a wider test.

Joe, K4JJS, organized the wider test that involved six of Virginia's 15 Districts, covered the largest city in Virginia (Virginia Beach), the capital (Richmond) and everything in between. It worked surprisingly well.

I was impressed that 12 remote base systems could be tuned to the same frequency without kerchunking one another, but it worked. Two Norfolk repeaters even reported a 3-hop into Glouster. The W4VB repeaters (145.330 and 442.920) reported linking to Franklin (444.825) which was connected to Smithfield, which was connected to Glouster. Ordinarily, I would not have recommended that.

There will be future testing of this capability. It is hoped that Franklin 2M (147.300) can be added in future tests which would add coverage to beyond Emporia in Virginia and increase coverage in North Carolina.

Requiring only a control operator at each repeater, the 'Big Party Line' can be configured in almost any manner desired and perhaps expanded even further by stringing the repeaters together as you do packet nodes.

I'm looking forward to future playing around with -- (oops! Testing) of this capability – how far will it go??

March Madness

The Virginia Digital Net (VDN) has expanded to a daily net following a 'March Madness' test of daily operation. The daily protocol; 1915L, Chip64/1300hz, 3.587.5USB is where you will find us. The VDN does not interfere with the CW net on the same frequency using LSB. The net could use a little traffic now that we have procedures that seem to be working out.

Also, the VDN, living up to its experimental charter, is testing daytime propagation on Saturdays at 1300L on the regular 80M frequency. 7.088USB is the back-up. There were six check-ins on 7 April 2007 with good print reported by most stations.

FrostFest

The annual trip to Richmond for FrostFest (www.frostfest.com) has become, for me, a sign that spring is on the way. This is especially true since the event moved to a February date some years ago. Sponsored by RATS (Richmond Amateur Telecommunications Society, www.rats.net, the event appears to have steady attendance every year. The event is also the ARRL Virginia Section Convention.

Austin Amateur Radio continues to support the 'fest. When I was ready to buy my Kenwood TS-2000, I bought it from AAR because of their ongoing support for the event.
<www.aaradio.com>

My favorite reasons for going to a hamfest are: 1) to see my friends and meet new ones and 2) to go to the forums. This year I was particularly interested in the D-Star presentation.

Fred Berger, K4LJF, made a very informative presentation and demonstration using two IC-2200H radios with digital boards. Since I knew very little about D-Star the forum was very useful. I learned that:

- D-Star is an open protocol so in time we can expect to see some competition in the market, homebrew plans, and software development.
- Digital voice and text travel on the same data stream and the call sign of the sending station prints on the receiving radio's display.
- To get the full advantage of the D-Star system a repeater really needs to be connected to an internet gateway.

D-Star looks like the real deal in terms of the next level of technology. I'm basing that on a simple observation; young people love to 'text'. Teenagers

The Scooter, still wearing some of its "Amateur Radio Communications" marking.

and 20-somethings coming into Amateur Radio will appreciate the ability to talk and text on their radios. While geezers like me might be puzzled by the allure of texting, we shouldn't be surprised by D-Star's appeal for younger operators.

Online forums on D-Star can be found at www.k5tit.org and <www.icomamerica/amateur/dstar>.

The Great Scooter Adventure

Readers may recall that the SHAMROCK MARATHON was the cover story for the RJ two years ago. It was time for a trip back to Virginia Beach to be part of the Amateur Radio support for this event. The Shamrock is a two day event with multiple races of several different distances. <www.shamrockmarathon.com>. Al Crawford, WA4TCJ, organizes support for both days. He gets support from several local clubs. For the marathon he had 53 volunteers.

On Sunday, the volunteers support a ½ Marathon and the Marathon. The beginning of one event overlaps the other on the same course. Hams provide support in a number of ways along with communications. They place all the mile markers and manually start the big clocks that are stationed around the course.

Job One is for Amateur Radio support is to insure participant safety. Hams are at each mile marker and water stop. Primary comms are on the Virginia Beach repeater (146.970) with a 440 simplex frequency as backup.

Now, here is the Great Scooter Adventure part. Having recently purchased a Cushman industrial truck, aka The Scooter, to help with the fetchin' 'n' totin' around the Podunk Tree Farm, I volunteered it for the Tail End Charlie vehicle.

The race organizers are interested in reports on the locations of; 1) the male and female leaders, and 2) the last person in the event – "Tail End Charlie". The position of Tail End Charlie is important because the support of water stops, aid stations, police support, traffic control and so on can be secured.

I rigged the Scooter with a 2M radio and trucked it down to Virginia Beach and got ready for a long day. The Scooter has a one cylinder, 8HP engine and is a noisy, relentless vibrator. I had installed both a speaker and earphones. Happily, 26 miles in a Cushman was accomplished with damage to neither backside nor hearing.

I created a little confusion by getting ahead of several late starters and I learned pretty quickly that I had to watch for the 'occupied' signs on the portable toilets as I passed to insure I didn't get ahead of a runner.

Excellent support from many local hams on both days, and an great job by the very busy NCS, Butch Burke, KE-4AZL, and Tom Moore, WS9B.

WB4ZNB

I mourn the passing of my dear friend Ralph Atkinson, WB4ZNB. We had a special bond that went beyond a friendship between two hams. He left me with a challenge – his station. He said, "Do whatever you think is best." I look forward to the creation of the WB4ZNB legacy station.

Standard identification cards issued in Pilot Program

Arlington County is piloting the nation's first test of new, high-tech identification cards, called First Responder Authentication Credentials. Arlington has issued more than 1,400 of the federally approved cards, which are encoded with critical data that enables commanders at the scene of an emergency to authenticate the responder's credentials using a wireless handheld device. The information on FRAC cards will:

- Securely establish emergency responders' identities at the scene of an incident.
- Confirm first responders' qualifications and expertise, allowing incident commanders

SERA at Frostfest 2007. Jim Campbell K4YM with two 'fest goers.

Frostfest 2007

to dispatch them quickly and appropriately.

• Enhance cooperation and efficiency among state and local first responders and their federal counterparts.

FRAC cards are part of the First Responder Partnership Initiative, a collaboration among emergency personnel from the National Capitol Region, Maryland and Virginia. For more information about the cards, visit the program's Web site at <http://www.virginiafrac.com http://m1e.net/c?19323028-4yb00EMnghPnU%402354457-zXmBddl2lTodo> .

Club Round-Up

Alford Memorial ARC

George Colletti, KE4SFO, was the recipient of the annual Ham of the Year award which is presented at the January meeting. George is rumored to be always full of energy and a willingness to volunteer. His efforts were reflected in this award. Congratulations George! <www.totr-radio.org>.

Atlanta Radio Club

The Atlanta Radio Club will host the 79th Annual Atlanta Hamfest on June 2. Once again you'll see one of the biggest bone yards around with plenty to choose from. ARRL's Dan Henderson, N1ND, will be the special guest this year and will be presenting a forum "Changes in Amateur Radio." Other forums will include QRP and DSTAR. <www.atlantahamfest.com>.

Fayette County ARC

The following folks were elected to serve for the coming year: President- Brian Haren, W8BYH; VP- Greg Manniges, KI4HRU; Secretary- Chris Clark, KI4QLW; and Treasurer- Huey Kenmar, KI4NGD. Congratulations!

Gwinnett ARS

GARS hosted its 10th Annual Tech Fest in January. What is tech fest, you ask? Well, up until now, we've started out answering that question every year by saying that it's NOT a Hamfest. But actually, this year, for the first time, a boneyard was added to the mix, so I reckon now we can say it's a Hamfest PLUS. And it's the "plus" part that really sets Tech Fest apart. This event offers the opportunity for hams.... and NON-hams... to get together to learn about various facets and modes of amateur radio. It's a friendly, non-threatening atmosphere where people can ask questions... and more importantly, get ANSWERS... about all kinds of ham-related interests. It's a place for sharing ideas, tips, information, experiences, and fellowship. It's Elmering to the max. The cost is FREE; there are fine door prizes; and there's even a free lunch. What's NOT to like???

Multiple groups, like the North GA QRP Club, SEDX Club, the Alford Memorial ARC, North Fulton ARL, GA Tech ARC, and Venture Crew 73 all set up a display, so attendees had ample opportunity to learn about operating both QRP and QRO, and could learn about and join one or more of these fine groups, while they were at it. The QRP club had a wide array of home-brew stuff on display, and the SEDX Club ran their new presentation on DXing 101.

There were a wide variety of displays, offering demonstrations on everything from PSK-31 to D-Star to Echolink to Pactor III to connectors to Morse code to Youth in Amateur Radio to emergency communications, and more. Gwinnett ARES members manned a table inside,

Our table at the Dalton Hamfest. Manning it are myself, John Talipsky, N3ACK, and Pete Seabolt, N4KHQ

where a number of go-kits were on display, and also manned the group's mobile command vehicle outside. Also on display, right beside it, was the Gwinnett county police department's communications vehicle. (WOW! If that's an example of our "tax dollars at work", our money did a great job!)

This year, the club did a superior job of promoting the event, and it showed in the number of attendees. Not only were there more hams there this year than in any of the past years, but there were also quite a few non-hams in attendance, as well, who had lots of questions on how to get licensed. As always, there was a fine free lunch, including a chili cook-off.

In other GARS news... GARS and Gwinnett ARES member Andrea Hartlage, KG4IUM, won the prestigious William R. Goldfarb Memorial Scholarship for 2007. The ARRL Foundation Board voted unanimously to name Andrea, who will graduate from Grayson High School next month with a 96.05 grade point average. Awarded to one high school senior each year, the Goldfarb Scholarship enables the recipient to receive a four-year undergraduate degree in engineering or science or in the medical or business-related fields. Andrea says she was "excited, honored and a little surprised" to be this year's Goldfarb Scholarship recipient. <www.gars.org>.

Vester Scott, N8EKA, past Georgia Correspondent, strolling around the GARS Techfest

Kennehoochee ARC

The following folks were elected to serve the club in the coming year: Chairman- Jim Studer, KI4ET; Vice Chairman- Sid Bishop, KB4QKZ; Treasurer- Lew Cason, N4HRA; and Secretary- Clark Macauley, KE4RQ. The 2007 Kennehoochee Hamfest was a great success again. Despite bone chilling weather many folks turned out to great pickins' in the boneyard. Many clubs were on hand along with vendors to sell their products and demonstrate dif-

Georgia ARES

Statewide ARES Meeting

Held at the Public Safety Training Center in Forsyth on January 27, this was, once again, a resounding success. Jeff Morrison, Program Director, Statewide Exercise - Operations, Georgia Emergency Management Agency, was the keynote speaker for the Section ARES annual meeting in Forsyth. Jeff's duties at GEMA include delivering, coordinating and oversight of the on-going management of a cross-discipline comprehensive exercise program in All-Hazard preparedness and response with a focus on the emergency management and homeland security responsibilities and functions of the Georgia Office of Homeland Security/ GEMA.

CONGRATULATIONS to this year's GA ARES Ham of the Year David Rudd, AI4JI, Emergency Coordinator for Walton county, and president of the Walton County Emergency Radio Club. Unfortunately, David was unable to attend the meeting, so we'll get that award to him ASAP. For a more detailed accounting of the meetings, see the listing in this newsletter for "Statewide ARES Meeting", following "ARES NEWS". Thanks to each and every one of you who attended. The dedication of our GA ARES members never fails to impress. Follow up to the meeting, including Jim's presentation, as well as others, can be viewed at <www.gaares.org>.

Letter of Recognition

On March 1, 2007, severe weather brought death and destruction across the state of Georgia to many of our Georgia counties. Of the 18 counties that reported damage from wind, rain, hail, straight line winds and tornadoes, Americus, Georgia was hit the hardest.

Amateur Radio Operators of Americus, Georgia stood that morning without blinking an eye, without notice, reservation or hesitation, and began response, rescue, damage assessment and recovery efforts, while being victims of a horrific and deadly tornado themselves.

Call W4CA

Amateur Radio Club of Americus responders are to be recognized for the outstanding roles they played in the midst of the storms. With no other hiding place, they formed, responded and took action to meet the needs of multiple agencies, the general public and others. These outstanding actions extend far beyond the realm of their usual duties and responsibilities. After receiving numerous emails from people who have witnessed their actions, I ask that each of them, as a team, be recognized.

The actions and performance of all who responded to the call of duty during these dangerous conditions bring great credit upon themselves, their local club and amateur radio. Their dedication and selfless acts of service are greatly appreciated.

The letter was presented by Greg Tillman, N4VAD, Assistant Section Emergency Coordinator Georgia ARES Operations.

School Round-Up

The LaFayette Middle School in Walker County received the call sign of KI4TEY. The school's club is co-sponsored by Jody Carter and Barry Eure, KS4RT.

Classic Drake Logbooks to be Available

Here it is, folks! I have been able to put together a "Commemorative Edition" of the official Drake logbook of years past. RL Drake, LLC has approved this printing. This is NOT an exact duplicate of any one version but a combination of all. The format remains the same and the front cover that was chosen was that of the Drake C-Line. The inside front cover is the same as they were all originally printed with fill-in lines for your station info. The first few pages and last few pages contain a collection of all the previous logbook pages. The originals had information about Drake and their plant as well as advertisement on the various model lines. Instead of one page, like the original, I copied all the versions so this edition will have all varieties under one cover. The cover of the logbook is a nice 60# weight cover stock with a textured, satin finish similar to the original. I'm using an off-white color stock to keep the vintage look. The inside pages (10 pages here) are black print on a good 70# weight offset text paper. Here too I used a natural color to preserve the vintage nature. I am asking for advance orders (no payments yet) to measure the serious interest in printing these logbooks. The cost to you will be $3.75 each plus shipping. I will use UPS shipping through my office so it will be at a discounted shipping rate. This is being sold at my cost. PayPal will be available but will have a processing charge. Email your requests to <wc4r@inbox.com>. I will have some that I will bring to the Dayton Hamvention (Drake Forum) in May. You can also pick yours up there to save on shipping.

Order status can be found at <http://www.wc4r.com/drakelogbook.htm> .

Hey, Old Man! Are You Going to the Hamfest Next Weekend?

by Lynn Lilla, W9DJQ
848 STACEY PLACE
VIRGINIA BEACH, VA 23464
Special to the SERA Repeater Journal

Here we are, Springtime, and off to a roaring start of the 2007 hamfest season. Or are we? I've headed up the Virginia Beach Hamfest for over 20 years and have watched our event, and others, see their heyday in the 90's, and continually taper off since then. Some hamfests have already closed their doors, with another one biting the dust this year up in New England: The Hosstraders Tailgate Swapfest. This is sad. There are a number of speculated reasons for this that all of us, who still love hamfests, need to be aware of.

In the beginning of my 46 years of Amateur Radio, in Chicago, I, and every other ham I knew, looked forward to those gatherings which occurred a few times a year around the Chicago area. They were events that every ham made plans for, months in advance, to ensure nothing interfered with those weekends.

Hams of that era were also basement scientists, experimenting and building radios, amplifiers, tuners, and other electronic contraptions, many from parts dissected from old TVs and radios. They, and those for many years before them, were the inspiration for many of the technological advances we enjoy today, and today's hams are able to enjoy the fruits of those experimenters. However, those advances have had some less than positive effects on the way we think and act within the Amateur community.

The greatest has been the Internet, the great information highway. It has made life easier for people of all ages. It helps educate and entertain us, along with providing unlimited shopping opportunities. Hams don't need to wait for a hamfest any longer to buy that new rig, antenna, connectors, etc. They simply go to any of your favorite vendors' websites, order it, and have it in their hands within five days. And EBay provides the opportunity to purchase that older rig or boat anchor that would normally be sought after at hamfest tailgating areas.

So, what has this done to hamfests? Well, a hamfest vendor is not at a show to provide entertainment for us. They are there to put food on their tables. If they don't make enough profit, they probably won't return to that show. With the combination of vendors doing less shows due to this reason, or going out of business completely, combined with ham attendance at shows steadily decreasing, most shows are downsizing or simply closing their doors forever. This is sad.

Now that I've written all that "mom and apple pie" philosophy, here's where you, the ham that still loves hamfests, becomes involved. If you want your local hamfest to continue to be there for you, and hams in the future years, YOU need to take an active part in promoting it. Call it advertising, call it "Elmering," call it anything you want. You need to do anything you feel necessary to preserve this time-honored tradition that you enjoy, called hamfest.

I realize that there are readers of this article who will ask the question, "Why should I be concerned if there is a hamfest or not?" The answer is simple: hamfests are where men and women, boys and girls gather with a common interest to socialize, see and meet hams they have only talked to on their radios, attend informative ham related forums, and yes, even possibly purchase a few technical goodies (maybe even a new rig).

Although I would be thrilled to see each and every one of you at the Virginia Beach Hamfest in September, it's much more important for you to realize that any hamfest within driving distance of you needs your support in order to survive.

So, don't leave it to someone else. Get out there and ensure that every ham you know, young or old, goes to the next hamfest drivable from your area. I hope to see many of you in Virginia Beach this coming September.

Charles Diamond, K5ASL

Greetings, Mississippi

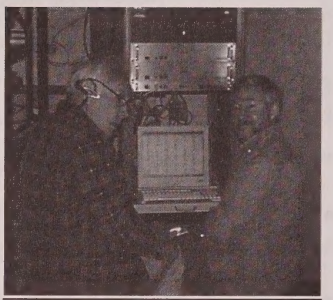
Well It is awful hard to believe that it is already May. I have been busy moving and building some storage sheds; planting the cane and rest of my garden, so ham radio has been on the back burner. I do hope to get my antennas back up and do some other work soon to get back going with my part of the hobby. All my doings haven't kept others from being busy this quarter and I have several things to report.

Hams respond to Severe Weather

Mississippi has, for the most part, escaped the severe weather bullet as compared with years past. However, EC, KB0ZTX, reports one round of severe thunderstorms in the Memphis area requiring ARES net activation with several hail reports being passed to the Memphis NWS. Those on the net were: KD5VMV (DeSoto EMA), N5UOV, KE5EOR, KE4OFA, KI4TGQ, KE-5MXY, W9IK, KE5BXL, KD5ONH, KE5EOS, KD5MYQ, N5PYQ, KB4FLW, and KB0ZTS (NCS). In addition, Brad Amacker, N5MZ, reports that the Hattiesburg ARC Emergency Net was activated during the storm event on March 1. Ham stations at the Forrest EOC, Wesley Medical Center, and Forrest General Hospital monitored the progress of the storm and advised officials of tornado warnings and provided reports of hail and downed trees to the NWS.

Mississippi Baptist Team

Marvin Little, KB5JN, reports that the Mississippi Baptist Disaster Team had their annual training at Central Hills Baptist Assembly at Kosciusko. The mobile communications trailer is now fully operational and 30 hams are ready to man the trailer in the event of an emergency.



D-star being set up by Tom Hammack W4WLF (left) and Greg Sarrat W4OZK.

Gulf Coast DEC represents Mississippi in National Hurricane conference.

Gulf Coast DEC Thomas Hammack, W4WLF, represented Mississippi in the Ham Forum at the National Hurricane Conference in New Orleans. Tom presented a paper on his experiences during

Katrina. The Ham community was also represented by speakers from Alabama and Louisiana.

Hattiesburg Hams

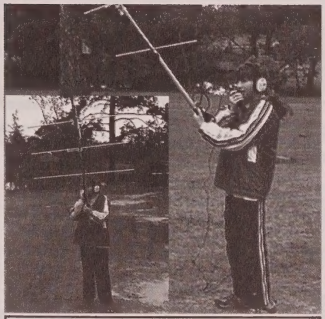
Forrest County EC Lex Mason, KD5XG, reports that the Hattiesburg ARC provided communications for the 1.5-mile run sponsored by the USM Sports Recreation Department. The race was held along the Longleaf Trace Trail with communications being provided by Ike Durant, N4FF, John Porter, W4KGJ, and Lex (himself), KD5XG.

Packet reporting

Well, many read the report about packet in the last issue of the Repeater Journal and it is still going forward and growing.

Once things get settled down here on my home front I hope to install a nice new-to-me-piece of feed line at my site in Mclaurin, MS. That installation will put my antenna height hopefully around 200 ft above ground. I have had offers for help, but still haven't gotten the time cleared for me to do the rest. However, new stuff is coming on line all the time.

Harold Stanton, K5GVR, has installed a digi on the big WXXV tower in McHenry, Mississippi. This is on a 900 ft. tower near the coast and we seem to be getting great reports from it. Earl Baker, K6MG,



Kevin Ready, N5KLR.

reports being able to chat with Jerry Leake, K5DMC, of Kiln, MS. This is a distance of about 300 miles, conservatively, so we are making big progress. The call sign of the big boy is N5UDK.

Remember if you're interested in helping with, donating to, or just curious about this project contact one of us K5asl@SERA.org and I will route you to where you need to go from your area in the Southeast. We would like to involve as many others as we can. Connections from the Coast to Jackson are now possible. And remember there are many ways to skin a cat.

ALINCO makes a SPLASH

with great audio and high grade waterproof design!

DJ-V17T 144 MHz HT
DJ-V47T 440 MHz HT

Actual Size

These powerful HTs make perfect companions for outdoor activities like fishing, camping or snow-sports.

The rugged polycarbonate materials are compatible to IPX7* so these HTs are submersible 1m/3ft. for 30 minutes! And unlike water-resistant radios you may have looked at before, the DJ-V17 and DJ-V47 both have a large 40mm internal speaker so the audio is clean and crisp, not muffled. You can enjoy 500mW max audio-output, new two-touch repeater access, and over 200 memories. A special battery-drain function helps avoid battery memory-effect. Other features include an ergonomic design, ultra-flexible antenna with SMA connector, 39 CTCSS settings, split function, two-level attenuator and more. Whatever your idea of outdoor fun, Alinco's DJ-V17 and DJ-V47 are ready to take on the challenges of rain, dirt and dust and come back for more.

- New, two-touch repeater access
- High grade waterproof materials compatible to IPX7* (submersible 1m/3ft. for 30 min.)
- Rugged polycarbonate body resists dirt, dust and moisture
- Large 40mm internal speaker for great audio!
- Highly visible backlit alphanumeric display
- Direct frequency input through illuminated keypad
- 200 Memories, plus one call channel and one repeater access parameter memory
- VFO, Memory and Scan modes
- Ultra-flexible antenna with SMA connector avoids breakage
- 39 CTCSS tone squelch (encode+decode) settings
- Tone burst function (1,000, 1450, 1750 and 2100Hz)
- Battery-drain function avoids memory-effect
- Cloning feature
- Ni-MH standard also uses optional Lithium-ion and NiMH battery packs or AA dry cell case
- SMA antenna port
- 2-level attenuator
- Waterproof single mic/speaker jack

Alinco guarantees this feature for 1 year provided all jack covers are properly and securely closed.

ANALOG & DIGITAL.

It's not just digital. Analog is there, too. Both capabilities in one radio. And what a new radio it is! With infrastructure and a family of D-STAR compatable radios, you're not buying an experiment. That said, digital is the future of amateur radio. And experimentation is a foundation of ham radio. So now you have to ask yourself, "do I pick up the analog only '91A version, which is optionally upgradeable to digital? Or do I take the '91AD, which offers digital right out of the box?" It's your choice. Commitment can be a wonderful thing.

Coming soon to your authorized Icom dealer!
